COMITE EXECUTIF
DU FONDS MULTILATERAL AUX FINS
D'APPLICATION DU PROTOCOLE DE MONTREAL
Soixante-sixième réunion
Montréal, 16 – 20 avril 2012

**SYSTÉMATISATION ET SIMPLIFICATION DE TOUS LES RAPPORTS SUR
L'AVANCEMENT REMIS AU COMITÉ EXÉCUTIF**

Les documents de présession du Comité exécutif du Fonds multilatéral aux fins d'application du Protocole de Montréal sont présentés sous réserve des décisions pouvant être prises par le Comité exécutif après leur publication.

1. Le Comité exécutif, à sa 64^e réunion, a chargé le Secrétariat du Fonds : « i) de convoquer une réunion avec les agences bilatérales et d'exécution afin de définir la nature, le contenu et le calendrier exacts des informations sur la situation devant être fournies dans les rapports périodiques, tout en examinant comment il serait possible de systématiser et de simplifier davantage la communication des informations actualisées au Comité exécutif pour toute la gamme des rapports; ii) de présenter à la 65^e réunion du Comité exécutif un compte rendu présentant les suites données aux réunions » (décision 64/6 c)).

2. Toutes les agences d'exécution ont fait parvenir leurs points de vue au Secrétariat avant le 2 février 2012, et la question a été abordée de nouveau dans les locaux du Secrétariat à l'occasion de la réunion de coordination interagences qui s'est déroulée du 7 au 9 février 2012.

3. Le document porte d'abord sur les types de documents remis au Comité exécutif, résume ensuite les propositions convenues lors de la réunion de coordination interagences et se termine par la présentation des recommandations.

Types de rapports remis au Comité exécutif

4. Le Comité exécutif reçoit un très grand nombre de rapports dans le cadre de tous les rapports exigés par le Fonds multilatéral, notamment : le rapport périodique et financier annuel, le rapport sur les retards dans la proposition des tranches annuelles, les plans d'activités, les demandes annuelles et le rapport périodique du Programme d'aide à la conformité, les rapports sur les projets achevés avec solde, le rapport sur la conformité, les rapports remis en raison d'exigences particulières, les plans de mise en oeuvre annuels des plans pluriannuels, les demandes de renouvellement de projets de renforcement des institutions, les évaluations qualitatives du rendement des agences d'exécution, les rapports d'achèvement de projet et le rapprochement des comptes. Ces rapports sont présentés à des points à l'ordre du jour qui leur sont propres, à l'exception des questions de conformité, qui sont abordées au point de l'ordre du jour sur « l'État de la mise en oeuvre des projets en retard et perspectives des pays visés à l'article 5 à se conformer aux prochaines mesures de réglementation du Protocole de Montréal », et du renforcement des institutions, qui est abordé dans les programmes de travail ou les amendements aux programmes de travail. Les rapports se limitent donc aux exigences du point à l'ordre du jour. Certaines questions concernant un projet peuvent être examinées à plusieurs points à l'ordre du jour, d'où s'ensuit l'inévitable situation des différentes questions sur le même projet posées à différents points à l'ordre du jour.

5. Le tableau ci-dessous résume la nature, le contenu et le calendrier de remise des rapports périodiques.

Rapports périodiques de situation	Nature	Contenu	Calendrier de remise
Rapport périodique et financier annuel	Surveiller la réalisation des étapes et les obstacles aux projets aux fins d'action et/ou d'émissions d'avis par le Comité exécutif, dates importantes des projets, rapprochement des renseignements financiers et des comptes annuels	Défini par les lignes directrices opérationnelles	Données financières au 31 décembre et remarques concernant l'information la plus récente
Rapport périodique annuel sur la mise en oeuvre / retards dans la proposition des tranches annuelles	Évaluer la réalisation des activités prévues dans la tranche précédente, l'utilisation de la clause de souplesse, les activités reformulées, la réalisation des objectifs de réduction de la consommation et le 20 pour cent de décaissement des tranches.	Modèle d'accord pluriannuel accompagné d'un texte/raison du retard dans la proposition des tranches annuelles	Selon l'échéancier précisé dans l'accord pluriannuel

Rapports périodiques de situation	Nature	Contenu	Calendrier de remise
Retards dans la mise en œuvre et rapports périodiques supplémentaires	Continuer à suivre les projets jusqu'à ce que les obstacles soient éliminés, ce qui pourrait entraîner des actions et/ou des avis du Comité exécutif	Courts rapports et exigences de la colonne des remarques du rapport périodique et financier annuel	Jusqu'à ce que l'obstacle soit éliminé ou, pour les projets en retard, jusqu'à ce que des progrès aient été réalisés ou le projet soit achevé
Projets comportant des exigences particulières pour la remise des rapports	Continuer à suivre les projets pour lesquels le Comité exécutif a demandé des rapports particuliers	Rapport périodique général détaillé portant parfois sur des informations précises, dont des questions concernant l'utilisation prévue des soldes	Selon la décision du Comité exécutif à cet effet
Projets achevés avec soldes	Suivre les soldes jusqu'à ce que toutes les sommes aient été décaissées ou retournées aux fins de réaffectation	Information sur les soldes retournés et en souffrance, la date de fermeture des comptes et les fonds retournés, selon le cas	Chaque réunion

Propositions de la réunion de coordination interagences

6. Cette section porte sur les propositions particulières sur la systématisation et la simplification des rapports des agences d'exécution et du Secrétariat du Fonds.

7. Le nombre de colonnes de données de la base de données du classeur Excel du rapport périodique annuel pourrait être réduit en éliminant les colonnes redondantes et inutiles. Les agences recevront des macros de données et vérification contenant déjà l'information contenue dans les bases de données du Secrétariat du Fonds et qui ne nécessitent pas d'actualisation. Des étapes ont été convenues pour la préparation et la mise en œuvre des tranches des plans de gestion de l'élimination des HCFC, ce qui a mené à la révision des lignes directrices opérationnelles du rapport périodique et financier annuel (voir l'annexe). Une des deux colonnes de remarques portera sur les progrès accomplis au 31 décembre tandis que l'autre fournira les données les plus récentes disponibles. Il a aussi été convenu de réduire et de simplifier le texte, notamment dans la section sur les développements au pays. Les agences d'exécution et le Secrétariat tenteraient de limiter le nombre d'échanges de questions sur les propositions de projets et, les agences, pour leur part, tenteraient de réduire la quantité de documentation proposée dans le cadre des propositions de projet. Le concept du système d'information en ligne a été abordé, mais aucune volonté d'adopter un tel système ne s'est manifestée. Le Comité exécutif pourrait souhaiter prendre note que le Comité exécutif et les agences d'exécution ont convenu de modifier les lignes directrices opérationnelles en ce qui a trait aux rapports périodiques et financiers, de réduire le plus possible la documentation dans le texte du rapport périodique et financier annuel et les propositions de projet, et les échanges de questions portant sur les propositions de projets, et ont examiné la possibilité d'un système d'information en ligne pour le rapport périodique et financier annuel.

8. Les rapports sur les retards dans la mise en œuvre, les retards dans la proposition des tranches annuelles, les questions de conformité, les exigences particulières pour la remise des rapports, les rapports sur les projets de démonstration et les projets achevés avec soldes pourraient être simplifiés s'ils n'étaient exigés que deux fois par année. Cette question a été examinée en fonction de la possibilité que le Comité exécutif se réunisse deux fois l'an. Il a été convenu de présenter cette proposition car elle réduirait la

remise de rapports du tiers pour ces activités. Il est important de préciser qu'établir le calendrier de remise des rapports à deux fois l'an alors que le Comité exécutif se réunit trois fois l'an pourrait entraîner un délai de huit mois sans rapport périodique à moins que le calendrier des réunions ne soit modifié à deux réunions par année. Le Comité exécutif a convenu d'examiner la question du nombre de réunions par année à la première réunion de 2013, à la lumière de la charge de travail qu'exige les plans de gestion de l'élimination des HCFC et des autres questions à l'étude (décision 61/48 b)).

9. À l'heure actuelle, les rapports sur l'état d'avancement des projets sont examinés au point de l'ordre du jour sur le « Rapport sur la mise en œuvre des projets approuvés comportant des exigences particulières pour la remise des rapports » et en tant que suivi à un problème de conformité recensé dans le rapport périodique et financier annuel au point « État de la mise en œuvre des projets en retard et perspectives des pays visés à l'article 5 à se conformer aux prochaines mesures de réglementation du Protocole de Montréal ». Il est proposé que les rapports sur l'état d'avancement des projets soient abordés dans un point à l'ordre du jour nouvellement intitulé « Rapports périodiques et conformité ». Dans certains cas, notamment les rapports sur l'achèvement de projets de démonstration pouvant fournir de l'information technologique détaillée, le Secrétariat pourrait présenter ces rapports sous un autre point de l'ordre du jour ou comme document d'information.

10. L'information sur les progrès accomplis dans les projets pluriannuels devrait être fournie dans la colonne des remarques du rapport périodique et financier annuel et dans le texte du plan de mise en œuvre annuel. L'information devrait être conséquente d'un rapport à l'autre, et les différences expliquées.

11. En ce qui concerne les plans de gestion de l'élimination des HCFC, le traditionnel rapport périodique annuel sur la mise en œuvre n'est pas nécessaire lorsqu'aucune tranche de financement n'est demandée. L'information sur les progrès serait indiquée dans la colonne des remarques du rapport périodique et financier annuel, comme décrit ci-dessus. En ce qui concerne les cas de non-conformité et le risque d'application de la clause de pénalité, le rapport sur le plan de mise en œuvre annuel devra être remis et il sera examiné au point « Proposition de projets ».

12. Les rapports sur les plans de mise en œuvre annuels de plans nationaux d'élimination en instance, les plans de gestion de l'élimination finale, le bromure de méthyle (lorsqu'il ne reste plus de tranches de financement) et les plans de gestion des frigorigènes ne seraient plus nécessaires. Ils seraient remplacés par un rapport d'achèvement de projet accompagné des rapports de vérification requis et du tableau 8 du projet pluriannuel approuvé, qui contient l'information financière relative à l'achèvement par activité. En l'absence du rapport d'achèvement de projet, les rapports de vérification seraient remis dès qu'ils deviendraient disponibles sous le nouveau point à l'ordre du jour sur les rapports périodiques et la conformité du rapport périodique et financier annuel.

13. Le PNUE prépare actuellement deux rapports périodiques détaillés sur ses activités du Programme d'aide à la conformité : un rapport intégré au rapport périodique et financier annuel présenté à la deuxième réunion de l'année et qui propose un compte rendu d'environ 400 projets en cours, dont le Programme d'aide à la conformité, et l'autre dans le contexte de l'approbation du Programme d'aide à la conformité annuel, à la troisième réunion de l'année. Il est proposé de ne présenter qu'un seul rapport annuel du Programme d'aide à la conformité et ce, à la troisième réunion de l'année.

Recommandations

14. Le Comité exécutif pourrait souhaiter :

- a) Prendre note du document « Systématisation et simplification de tous les rapports sur l'avancement remis au comité exécutif » présenté dans le document UNEP/OzLPro/ExCom/66/18;
- b) Demander :
 - i) Que l'information demandée précédemment aux fins de présentation au point « Rapport sur la mise en œuvre des projets approuvés comportant des exigences particulière pour la remise des rapports » soit reportée avec les autres rapports périodiques et les questions sur la conformité au point « Rapports périodiques et conformité »;
 - ii) Que l'information sur les accords pluriannuels dans la colonne des remarques du rapport périodique et financier annuel soit incluse dans le texte du plan de mise en œuvre annuel, et que les différences soient expliquées;
 - iii) Que les plans de mise en œuvre annuels ne soient pas requis en l'absence d'une demande de financement de tranche, sauf dans les cas où la clause de pénalité risque d'être appliquée;
 - iv) Que les agences proposent des rapports d'achèvement de projet accompagnés des rapports de vérification disponibles et du tableau 8 du projet pluriannuel approuvé, en remplacement du plan de mise en oeuvre annuel pour les plans de gestion des frigorigènes, les plans de gestion de l'élimination finale, les plans nationaux d'élimination et les rapports sur le bromure de méthyle et, en l'absence d'un rapport d'achèvement de projet, un rapport de vérification pourrait être remis dès son achèvement dans le cadre d'un rapport périodique, si le rapport de vérification est terminé pour la première et la troisième réunions du Comité exécutif, ou du rapport périodique et financier annuel;
 - v) Que le PNUE présente un rapport périodique détaillé des activités du Programme d'aide à la conformité à la troisième réunion de l'année dans le cadre de l'approbation du Programme d'aide à la conformité, et fasse état des obstacles à la mise en œuvre du Programme d'aide à la conformité dans le rapport périodique et financier annuel.

Revised

OPERATIONAL GUIDELINES FOR PROGRESS AND FINANCIAL REPORTING

Purpose

1. This uniform format for progress and financial reporting was mandated by the Executive Committee to provide for greater ease of cross-referencing; consistency and use of standard reporting periods; clarification of terms; greater ease of tracking the funds through the various stages of project implementation; information on percentage of funds disbursed; and reduced duplication between implementing agencies' progress reports and financial reports (decision 17/22). The revision of the guidelines was mandated by the Executive Committee at its 25th Meeting ([decision 25/8\(b\)44](#)) [and as a result of a workshop with the implementing agencies pursuant to the Executive Committee's decision on streamlining progress reporting \(decision 64/6\(c\)\)](#):-

2. This document provides a compilation of pertinent Executive Committee decisions into one user-friendly tool for complying with the requirements for progress and financial reporting of the Multilateral Fund. These guidelines provide the following information, inter alia:

- flow of funds to final beneficiary;
- contributions by way of bilateral activities;
- status in terms of proposed, expected and actual implementation;
- the amount of funds allocated and utilised to date;
- the balance of funds available for disbursing and planned commitments;
- activities since the last report and cumulative data;
- ongoing project preparation activities;
- information on project agreements;
- requests for adjustments upon which decisions may be taken; and,
- data that will assist the Treasurer in determining if any additional funds are available for new approvals.

Background

3. The Format for Reporting Progress and Financial Information combines information from the Uniform Format for Annual Financial Reports (UNEP/OzL.Pro/ExCom/12/37, Annex III) with the implementing agencies input to the Consolidated Progress Report (UNEP/OzL.Pro/ExCom/10/40, Annex IV) as presented in decision 17/22 and modified by decisions [19/23](#) [and 64/6\(c\)](#). Pertinent data required by the Interim Monitoring and Evaluation Guidelines (decision 18/20) and the implementing agency business plans are also incorporated. The data bases from each implementing agency will be compiled for the analysis provided in the Consolidated Progress Report.

4. It should be noted that progress and financial reporting does not replace the requirement in the agreements between the implementing agencies and the Executive Committee for annual audited report financial accounts to be submitted to the Executive Committee through the Treasurer. Agencies should

co-ordinate with the Treasurer to adjust annual audited financial reports to enable these reports to be fully reconcilable with progress and financial reporting. This was re-emphasised in Decision 25/8 (a).

SECTION I: FORMATS FOR DATA BASE AND SUMMARY NARRATIVE

5. At its 19th Meeting, the Executive Committee noted the importance of ensuring that the information in the summary narrative of the report was fully consistent with that contained in the database submitted by the implementing agencies. To achieve this consistency, formats are provided for both the data base and the summary narrative that precedes it. The database format is attached in Annex I and Annex II.

Submission Requirements

6. One report will be presented per year. The electronic version of the file should be received in the office of the Secretariat exactly eight weeks prior to the 2nd Executive Committee meeting scheduled in that calendar year or by the 1st of May, whichever is earlier.

7. Files should not include passwords, protected cells, borders, colours, different font styles, or un-required highlighting unless mutually agreed with the Secretariat since files from all agencies must be combined to compile the Consolidated Progress Report.

8. No numeric or date entry should have spaces, commas, dashes or any other punctuation marks entered except that which is automatically assigned by the cell format. All dates should be provide in a date format. For example, May 1995 should be entered "5/1/95"; however, the display of the date will be "May-95".

9. A copy of the format for the data base is provided in the accompanying Excel [20097](#) workbook (OG-PR(revised).XLS) in the worksheet titled "Data Base". Definitions for these formats are provided in Section III.

Data Base

10. Implementing agencies will submit their data tables for Progress and Financial Reporting in the spreadsheet format used by the Fund Secretariat (currently Microsoft Excel [92007](#)) by email or as specified by the Secretariat. Each agency's database will be available to the Executive Committee on the web site of the Secretariat [as part of the Consolidated Progress and Financial Report data base](#), with a printout available upon request.

11. The data base used by the Fund Secretariat (Microsoft Access [20097](#)) may be used if the data base formats are interchangeable with the spreadsheet format. Additional programming is necessary to enable an Access data bases to be interchangeable with the spreadsheet format.

12. For presentation purposes, all project data should be grouped by status, e.g., completed, ongoing, transferred and closed projects. Data within these groups should be presented in alpha-numerical order according to Country, Sector, Meeting Number, Type, Inventory Number, and Region. Agencies should provide totals where appropriate for each column.

13. Implementing agencies should include information on dates of approval and implementation of projects and disbursement of funds, on a project-by-project basis as approved by the Executive

Committee (sub-project-by-sub-project basis, where applicable), and to highlight in the summary narrative the reasons for any delays, since such delays could lock up Fund resources for significant periods, possibly several years.

Summary Narrative

14. The format for the summary narrative of progress and financial reports is provided in Section II.

15. The descriptive narrative for the data base should be submitted ~~both in electronic version and printed hard copy~~. The ~~electronic version~~~~printed copy~~ will be ~~distributed~~included with meeting documentation. Microsoft allows summary narrative text to be linked to a data base/worksheet which enables data in data bases/worksheets to be automatically updated in narrative texts. Summary narrative may be linked to the data base electronically, but if such a file is linked, a copy of a non-linked summary narrative file should also be submitted.

SECTION II: FORMAT FOR THE SUMMARY NARRATIVE OF AGENCY PROGRESS REPORTS

16. Implementing agencies should use the following section and sub-section titles and provide the information required according to the format without any changes in headings. In some cases (particularly for UNEP), certain sections are not pertinent such as those pertaining to project preparation and investment projects. In such cases, no text is required. UNEP's unique activities associated with its clearinghouse and networking functions as well as its regional training activities will be addressed under Section III.

I. Project Approvals and Disbursements

A. Annual Summary Data

17. This section should begin with a summary in a few sentences. The format for this table is provided in the accompanying workbook (OG-PR(revised).XLS) as a worksheet entitled "Annual Summary". This table does not distinguish agency or national implementation. The data provided by year should not include time-sensitive accounts or retroactive projects (projects where the phase-out occurred before the project was approved by the Executive Committee). Retroactive projects and time-sensitive accounts should be indicated as one cumulative figure. It should be noted that project types are not distinguished so an investment project counts as one approved project as does a technical assistance project.

B. Interest

18. This section should describe the status of interest and include annual information about interest earned and interest returned.

C. Summary Data by Type (CPG, DEM, INS, INV, PRP, TAS, TRA)

19. This section should begin with a summary in a few sentences. The format for this table is provided in the accompanying workbook (OG-PR(revised).XLS) as a worksheet entitled "Summary of Data by Project Type". The table includes approvals, adjustments and disbursements by type of project/activity.

D. Multi-year agreements

20. This section addresses the multi-year agreements. It should highlight the accomplishments and indicate any relevant issues concerning the current implementation of the agreements. Annex II should be referenced in this section of the narrative.

E. Sector Phase-Out by Country

21. This section was for indicating the sectors by country for which total phase-out has been funded. To some extent, much of this information would be contained in the new Section D on Multi-year agreements, except for those one-off investment projects that result in a total sector phase-out. The status of these projects should be indicated in this section.

II. Project Completions since Last Report

A. ODP phased out since Last Report

B. Non-investment Project Completions since Last Report

1. Country Programmes

2. Technical Assistance

3. Training

22. Following a summary of investment and non-investment activities in a few sentences, a table of completed projects should be presented according to the format provided in OG-PR(revised).XLS in the worksheet entitled “Completed Since Last Report”. If a date of financial completion is provided, it will be assumed that no additional disbursements are anticipated. One table can be provided for both investment and non-investment projects.

III. Global and Regional Project Highlights

A. Global Projects

B. Regional Projects

23. This section provides for a brief narrative, about 200 words, for activities on Global and Regional Projects. UNEP’s CAP activities should be listed under global projects.

IV. Performance Indicators

A. Agency’ Business Plan Performance Goals

24. Each agency stipulates its performance goals for the annual business plan. This sub-section should present those indicators and address how the agency is meeting those goals.

25. The narrative for the following sub-sections provides summary information for each region, sector, and implementation characteristic and type for non-investment projects. A few sentence summary should precede each table. The format for the tables in the following sub-sections is provided in the accompanying workbook (OG-PR(revised).XLS) in worksheets entitled “Cumulative Completed Investment Projects”, “Cumulative Completed Non-Investment Projects”, “Cumulative Ongoing Investment Projects”, and “Cumulative Ongoing Non-Investment Projects”. This enables the agencies to present a summary of all of the projects that they have completed since the beginning of the Multilateral Fund. The data in each of the five sections should equal the grand total.

B. Cumulative Completed Investment Projects

C. Cumulated Completed Non-Investment Projects

D. Cumulative Ongoing Investment Projects

E. Cumulative Ongoing Non-Investment Projects

- V. Status of Agreements¹ and Project Preparation (where applicable), by country**
- A. Agreements to be signed/executed/finalized and when they will be ready for disbursing**
 - B. Project Preparation by country, approved amount, and amount disbursed.**

26. This section could begin with a few sentences and should follow with a table on agreements and one on project preparation. The format for the project preparation table is provided in the accompanying workbook (OG-PR(revised).XLS) as a worksheet entitled “Active Project Preparation”. Project preparation should be listed by region, country, and by project number. Only project preparation accounts that are currently active, i.e. for which there is no date of financial completion, should be listed in this table.

- VI. Administrative Issues (Operational, Policy, Financial, and Other Issues)**
- A. Meetings Attended**
 - B. Implementing Agency and Other Co-operation**
 - C. Other Issues**

27. The agency will list those meetings attended and any interagency (including bilateral agencies) co-operation undertaken during the reporting period. In the past, agencies included an adjustments section. However, as adjustments are now addressed in the context of the Balances Report, no adjustment section is needed.

Annex I Country Developments

28. This annex will be listed by country for the countries in which the implementing agency is involved. It should contain the following sections by country: Section A: highlights of projects activities, Section B: Institutional Strengthening activities, Section C: Activities provided from agencies’ support costs, Section D: Activities to assist other agencies, ~~Section E: CAP activities (for UNEP), and Section F: non-CAP activities (for UNEP),~~

29. Section A should address highlights of projects and activities under agency implementation, entitled “Country Developments”. The paragraph should indicate the number of projects formulated, amount approved (US \$), and the ODP to be phased out. It should then indicate what has been completed and how much was phased out. The next sentence should address reasons for delays. The last sentence should indicate the amount of disbursements in the country for your agency’s projects. This format is based on UNDP’s presentation to the 25th Meeting.

30. Section B should address the activities of institutional strengthening units whose funds are allocated by the concerned implementing agency. It will focus on the goals, objectives, and activities funded through the institutional strengthening unit allocation provided by the Executive Committee. The narrative should also address any additional requirements specified by the Committee in its decision

¹ Project documents represent agreements for some agencies.

concerning institutional strengthening renewal (Decision 19/29 [b and c]). The paragraph should indicate visits from the implementing agency, personnel hired, and activities underway by the ozone office. This format is based on UNDP's presentation to the 25th Meeting.

31. Section C should indicate any types of activities that were provided by the implementing agency from its administrative costs. Section D should address any activities conducted by your agency to assist other agencies. ~~This would be most relevant to CAP and as relevant for the other implementing agencies. Sections E and F are for UNEP to address its CAP and non-CAP activities.~~

Annex II Data Base (note: completed, ongoing, closed, and transferred will be part of one data base). The data should be summarised per decision 17/22 by implementation characteristics. Annex II contains a database worksheet and an MYA worksheet.

DEFINITIONS OF TERMS IN THE PROGRESS AND FINANCIAL REPORTS AND THE CONSOLIDATED PROGRESS REPORT

32. The terms used in the data base and summary narrative are defined in this section. Definitions are listed in alphabetical order to provide a glossary for those who are charged with provided the data for the data base and summary narrative. An asterisk (*) appears before those terms which can not be changed from progress report to progress report as they are linked to data in the original project proposal. Two asterisks (**) are for data required only for the macros for the verification program and three asterisks (***) are for data that are required only for the MYA database.

*****Actual ODP Consumption for Reporting Year** – The amount of consumption reported to the Ozone Secretariat pursuant to Article 7. If data from other sources, the other source should be footnoted.

*****Actual ODP Production for Reporting Year** – The amount of production reported to the Ozone Secretariat pursuant to Article 7. If data from other sources, the other source should be footnoted.

Adjustment - Adjustments to the initial approved funding level (could be positive or negative values). Only those adjustments that have been approved by the Executive Committee should be listed.

***Agency Code** - Name of implementing agency, e.g. UNDP - United Nations Development Programme; UNEP - United Nations Environment Programme; UNIDO - United Nations Industrial Development Organization; IBRD - World Bank; and name of country for bilateral agencies.

***Agency/National Implementation** - An implementation characteristic. This column indicates if the project is being implemented through agency (A) or national (N) implementation. Some projects are implemented by the agencies and others by national governments or the enterprises themselves. Institutional strengthening is to be reported as (N) national implementation.

***Approved Funding** - Funds as initially approved by the Executive Committee. Any change in the initial approval should be indicated under "Adjustment". Support costs should not be included.

****Approved Funding plus Adjustment** - The sum of Approved Funding and Adjustment.

****Average Number of Months Currently Expected until Completion** - The average difference between the Planned Date of Completion and the Date Approved.

****Average Number of Months from Approval** - The average difference between the date of the Progress Report and the Date Approved.

****Average Number of Months from Approval to Completion** - The average difference between the Date Completed (Actual) and the Date Approved.

****Average Number of Months from Approval to First Disbursement** - The average difference between the First Disbursement Date and the Date Approved.

****Balance** - The difference between approved funding plus adjustments minus funds disbursed. This should be specified for completed, ongoing, transferred, and closed projects. All projects with a negative balance require action by the Executive Committee.

Business Plan Allocation (Investment/Non-Investment) - Indicate whether the allocation is for investment projects or non-investment projects. *The designation of investment/non-investment is based on where if the project was included in the business plan's allocation for non-investment or investment.*

Chemical – The substance for which the project was approved to phase-out. The notations of the chemical are as follows: CFC (Chlorofluorocarbon), HAL (Halon), CTC (Carbon Tetrachloride), TCA (Methyl Chloroform), and MBR (Methyl Bromide). *In cases where there are more than one chemical, please enter each chemical separated by a space in one text field on the same row as the project number.*

Closed Projects/Activities (CLO) - Projects that were closed without implementation. Under most, if not all circumstances, such projects should also have an entry under the column entitled “Adjustments” to indicate that un-utilised funds were returned when a date of financial completion is provided; however, expenditures may have been incurred before the project was closed which will be noted under the column “Funds Disbursed”. Projects are listed as “CLO” only after the Executive Committee has approved the “Adjustment”, otherwise the project remains classified as “ONG”. Typically there should be no phase-out associated with these projects, except in the case of bankruptcy. No date of completion, except date of financial completion, should be provided.

Completed Projects/Activities (COM) - Projects that have been commissioned and the ODP has been phased-out. For activities without an ODP phase-out, when the activity was completed. Projects that have been completed but the company went bankrupt should be considered COM and FIN when accounts are closed because the Executive Committee requires that project completion reports should be prepared for such projects. *Any balances to be returned from FIN projects should be included in the agencies' Balances Report.*

Consumption ODP Phased Out - The amount of ODP **consumption** phased out for completed projects. This may include partial phase-out if phase-out is to occur in stages as indicated in the project proposal. Determined by using the same calculation as was used to define “ODP to be phased-out” for that specific project (either 3-year average or actual amount of consumption in the year previous to the submission) but must be reported consistently for each project. ODP data should be reported to the level of the first decimal point (i.e. 25 ODP tonnes is 25.0 ODP tonnes). *Please note that the maximum phased-out is the amount indicated in the proposal for multi-year agreements. The phase-out from institutional strengthening projects should be entered once the project is completed.*

*** Consumption ODP to be Phased Out per Proposal-** The amount of **consumption** phase out is based upon the average of the three years prior to submission of the proposal or the amount of consumption the year previous to the submission of the proposal as per UNEP/OzL.Pro/ExCom/16/20, paragraph. 32b. For projects approved prior to that decision, agencies and the Secretariat will co-ordinate to estimate an amount of phase-out comparable to the guidance from the 16th Meeting. For projects approved subsequent to the 25th Meeting, the amount of ODP to be phased out per the Report of the Executive Committee meeting at which the project was approved. *Please note that the phase-out is the amount indicated in the agreement for multi-year projects. Institutional strengthening projects for which a phase-out is listed in the reports of the Executive Committee should be entered for CFCs.*

***Country Code** - A three digit code for countries. For example, CPR is China, People's Republic and EGY is Egypt. A list of country codes is attached as Annex III.

~~**Cumulative Interest Accrued**—The amount of interest, cumulative to the previous year, accrued on behalf of the Fund for Executive Committee allocation.~~

***Date Approved** - The month of the Executive Committee Meeting at which the project was initially approved and funds allocated. For example, for the 25th Meeting, the “Date Approved” would be entered as July 1998.

***Date Completed (Actual)** - Date when ODP was phased out. For activities, the date at which the activity was implemented (e.g. when training course was completed).

***Date of Completion per Proposal** - Date when ODP phase-out was supposed to occur according to the proposal. For activities, the date at which activity was expected to be implemented according to the proposal. Calculated by adding project duration as specified in work programme or project proposal to the “Date Approved”.

Date of Financial Completion - The date of the meeting at which the Executive Committee approved the final adjustment at which point all expenditures were reported and the account is closed. If the date of that meeting was on or prior to the 15th of the month (i.e. 8-11 June 1998), the approval date is entered as the first of the month of the meeting (i.e. 1-June-98). If the meeting at which the project was approved occurred after the 15th of the month (i.e. 25-28 June 1998), then the approval date is entered as the first of the following month (i.e. 1-July-1998). The absence of a date in this column means that the account has not been closed.

Disbursement Method - An implementation characteristic. Some agencies may disburse funds as a project is implemented or only disburse funds after the project is implemented. This column specifies the disbursement method: disbursement during implementation (I), disbursement for retroactive (R) projects (projects approved after the ODP has been phased out); and disbursement for projects begun after Executive Committee approval for which disbursement provided after implementation (D). Agencies agreed to eliminate “D” from the choices of disbursement pending World Bank confirmation (on 28 August).

Estimated Disbursements in Current Year - Money set aside for continuation of project/activity for the current year. Estimated Disbursements in Current Year should be provided for both completed and ongoing projects and in the annual summary table. This replaces “Planned Commitments in Current Year” that was provided in progress reports through the 25th Meeting.

Financially Completed Projects (FIN) - For completed projects only where there is a date of financial completion and all accounts have been finalized. Completed projects for which funds are being returned as reflected within the Adjustment Table. The project may be classified as “FIN” only after the Executive Committee meeting when the report is presented, classified as “COM” with an adjustment indicated, and approved. The next business plan will then show the project as “FIN”.

First Disbursement Date - Date of any expenditure toward implementation of a project.

*****Funds Committed by ExCom** – Total amount approved in principle for the multi-year agreements.

*****Funds Disbursed to the Country** – The total amounts for which the implementing agencies disbursed to the country for the implementation of the multi-year agreements.

*****Funds Released including Present Year by ExCom** – Total amount approved and released by the Executive Committee for the implementation of the multi-year agreements. Please note that this amount should also include the amount approved in the current year.

Funds Disbursed - Actual expenditures by agency (excluding obligations). Does not include support costs.

Funds Obligated - Funds that have been obligated but not disbursed. Funds obligated are also defined as the balance of an allocation, allotment or appropriation that has been obligated or not ready to be disbursed.

Implementation Characteristics - Columns that include information such as agency/national implementation; ~~time or objective sensitive account~~; and disbursement method.

~~**Interest Accrued since Last Report**—The amount of interest accrued on behalf of the Fund since the last progress report.~~

***Inventory Number** - A sequential number per country assigned by the Fund Secretariat.

***Meeting Number** - Number of meeting at which project initially approved and funded. For example, the entry for the Eighteenth Meeting is 18 and the entry for the Fifth Meeting is 5.

Multi-Year/Multi-Year Partial Phase-out/One-off Phase-Out/Individual/RMP/RMP Update/RMP for Non-LVC/Halon Banking – Column that includes information to determine whether a project is a multi-year, one-off total phase-out project, individual project, RMP or RMP update or halon banking project. *A multi-year agreement is one that brings a sector or chemical to total phase-out. Those multi-year agreements that do not bring the sector or chemical to total phase-out should be entered as “Multi-year partial phase-out”. RMPs for non-LVCs should be entered as such. RMP updates are for LVCs only.*

~~**Multi-Year Current Tranche Confirmation of Annual Performance Target**—Annual Target Met as Reported by Country—Indicate whether the country meets the annual target set in the agreement for the relevant tranche.~~

~~**Multi-Year Current Tranche Confirmation of Annual Performance Target**—Verification Completed—Indicate whether the implementing agencies complete the verification of the multi year agreement for the relevant tranche.~~

~~**Multi-Year Current Tranche Confirmation of Annual Performance Target**—Verification Report to ExCom—Indicate whether the implementing agencies submit the verification Report to the Executive Committee for the relevant tranche.~~

~~**Multi-Year Current Tranche—Consumption Performance target**—The level of consumption targeted for the relevant tranche in ODP tonnes. *For agreements with more than one implementing agency, the consumption target is the amount of consumption for which the agency concerned is responsible.*~~

~~**Multi-Year Current Tranche—Actual Consumption**—The actual level of consumption for the relevant tranche in ODP tonnes. *For agreements with more than one implementing agency, the consumption target is the amount of consumption for which the agency concerned is responsible.*~~

~~**Multi-Year Current Tranche—Production Performance target**—The level of production targeted for the relevant tranche in ODP tonnes.~~

~~**Multi-Year Current Tranche—Actual Production**—The actual level of production for the relevant tranche in ODP tonnes.~~

****Number Completed** - Number of activities for which ODP has been phased out or the activity has been completed.

****Number of Approvals** - Number of activities approved by calendar year.

*****ODP Consumption Allowed for the Reporting Year** – The amount of consumption allowed for the reporting year per the agreement.

*****ODP Production Allowed for the Reporting Year** - The amount of production allowed for the reporting year per the agreement.

Ongoing Projects/Activities (ONG) - All approvals not classified as completed, financially completed, transferred, or closed.

****Overall Cost-Effectiveness to the Fund** - Approved Funding plus Adjustment divided by ODP phased out in kilograms.

****Per Cent Completed** - Number of Projects Completed divided by the Number of Approvals.

****Per Cent of Funds Disbursed** - Funds Disbursed divided by Approved Funding plus Adjustment, excluding support costs.

****Per Cent of ODP Phased Out** - ODP Phased Out divided by the ODP to be Phased Out.

Planned Date of Completion - The date when the investment project is currently expected to be result in a permanent phase out (when the project is currently expected to be commissioned or fully implemented) or in the case of non-investment projects, when the activity is expected to be implemented.

~~**Latest Planned Date of Completion - 22nd Mtg / 28th Mtg / 31st Mtg / 34th Mtg / 37th Mtg - Planned Date of Completion**~~—The date against which projects are measured to determine if a project is considered to have an implementation delay as per Decision 22/61 (b).

Production ODP Phased Out - The amount of ODP production phased out for completed projects. This may include partial phase-out if phase-out is to occur in stages as indicated in the project proposal. ODP data should be reported to the level of the first decimal point (i.e. 25 ODP tonnes is 25.0 ODP tonnes). *Please note that the maximum phased-out is the amount indicated in the proposal for multi-year agreements.*

*** Production ODP to be Phased Out per Proposal** -- The amount of production phase out is based upon the average of the three years prior to submission of the proposal or the amount of consumption the year previous to the submission of the proposal as per UNEP/OzL.Pro/ExCom/16/20, paragraph. 32b. For projects approved prior to that decision, agencies and the Secretariat will co-ordinate to estimate an amount of phase-out comparable to the guidance from the 16th Meeting. For projects approved subsequent to the 25th Meeting, the amount of ODP to be phased out per the Report of the Executive Committee meeting at which the project was approved. *Please note that the phase-out to be recorded is the amount indicated in the agreement for multi-year projects.*

***Project Title** - The title listed in the approval recorded in the report of the Meeting of the Executive Committee at which the project was approved. Project title should include name of enterprises and/or sub-sector. If several enterprises are represented by one approval, individual enterprises may constitute one project or could be grouped by sub-sector and all information required for a data base entry should be provided.

***Project Number** - The project number includes the following columns in the following order: Country Code, Sector Code, Meeting Number, Type, and Inventory Number. To save space in the worksheet, the individual column headings will not be listed. An example of a project number is as follows: ARG/REF/18/INV/118. This sample project number is for a project approved for Argentina in the domestic refrigeration sector at the 18th Meeting of the Executive Committee. It is an investment project, and the 118th project/activity approved by the Executive Committee for Argentina. Inventory number used internally by the individual implementing agencies should not be used.

***Region Code** - The regional code used by the Fund Secretariat. Codes for regions are found in the attached Annex III.

Remarks/Remarks (Latest Information) - Implementing agencies should specify progress achieved towards the goals of projects/activities by milestones achieved and actions towards next goals. This section should be used to indicate if the conditions of approval have been achieved and progress toward achieving those conditions. While the progress report data are based on a snapshot as of 31 December, the remarks may indicate most recent progress, especially with regard to the latest tranche of multi-year agreements. Information up to 31 December is included in the Remarks column and latest information after 31 December is included in Remarks (Latest Information) column. Lessons learned should be noted in accordance with any monitoring and evaluation guidance such as measures taken to remedy problems, when equipment used for CFC processes was destroyed, when project completion reports were submitted, and the accomplishment of business plan goals. Reasons for any delays should be presented in this section. Information should include:

o A brief report on the actual progress made in the calendar year;

- o Milestones achieved during the reporting period;
- o Was there any delay during the reporting year? (yes/no);
- o If the answer to the above is yes, reasons for delays and actions taken to overcome them;
- o Any ongoing recurring problem that hampers implementation?(yes/no)?;
- o If yes, any action required from the ExCom to overcome the problems?

Milestones for investment and non-investment projects, HPMP preparation and HPMP tranches are as follows:

Investment Project Milestones	Non-Investment Projects
<ul style="list-style-type: none"> - Grant agreement submitted to beneficiary - Grant agreement signature - Bids prepared and requested - Contracts awarded - Equipment delivered - Commissioning and trial runs - De-commissioning and/or destruction of redundant baseline equipment 	<ul style="list-style-type: none"> - Legal arrangements - Initial stages of project implementation begins - Intermediate goals achieved - Project completion and follow-up
<u>HPMP Preparation Milestones</u>	<u>HPMP Annual Tranches</u>
<ul style="list-style-type: none"> - <u>HCFC survey completed</u> - <u>Stakeholders workshop held</u> - <u>Local institutions identified</u> - <u>Experts recruited</u> - <u>All technical input completed</u> - <u>Draft document completed</u> 	<ul style="list-style-type: none"> - <u>First mission/Working arrangements (agreement/document signatures/PDA) agreed</u> - <u>Terms of reference completed</u> - <u>First disbursement</u> - <u>All funds disbursed</u>

In addition, implementing agencies should also provide progress on multi-year, one-off projects and RMPs to address provisions and implementation conditions of the agreements. Remarks may be brief for the annual tranches of multi-year agreements for example: “Consumption target met”, “Consumption target not met action taken...”, “Required establishment of servicing centres needed for phase-out delayed; action taken...”.

***Sector Code** - The sector as indicated in the proposal, as recorded in the meeting report where the project was initially approved, or as indicated in the Inventory of Approved Projects. A list of sector codes is provided in Annex IV attached.

*****Sector Plan/National ODS Phase-Out Plan** – The sector for which the multi-year agreement was approved or national ODP phase-out plan.

Status - Status should be designated with one of four terms: ONG for ongoing; COM for completed; CLO for closed; FIN for financially completed projects; and TRF for transferred to another implementing agency.

Support Cost Approved - Approved administrative costs for agency in delivering a programme or activity approved by the Executive Committee. *The support cost approved is based on the original approval since any changes after the approval should be reflected in “support cost adjustment”.*

Support Cost Adjustment – Adjustments to the initial approved support costs (could be positive or negative values). Only those adjustments that have been approved by the Executive Committee should be listed.

Support Cost Disbursed - Administrative costs disbursed by the agency in delivering a programme or activity approved by the Executive Committee.

****Support Cost Balance** – The difference between support cost approved minus support cost adjustment and support cost disbursed. This should be specified for completed, ongoing, transferred, and closed projects. All projects with a negative support cost balance require action by the Executive Committee.

Support Cost Obligated - Administrative costs allocated for obligated balances.

~~**Time-/Objective Sensitive Accounts** – An implementation characteristic. This column indicates if the project is implemented through a time (T) or objective sensitive (O) account. Some projects are approved for a one year or three year period and their completion represents the end of a period of time instead of the accomplishment of a project objective. Institutional strengthening, and until 1996 in the case of the World Bank, project preparation, are examples of time sensitive accounts. Other accounts are objective sensitive, meaning their completion date is dependent upon achieving the project’s objective.~~

*****Total ODP Consumption to be Phase-out for the Plan** – The total amount of consumption to be phased out for a multi-year agreement.

*****Total ODP Production to be Phase-out for the Plan** - The total amount of production to be phased out for a multi-year agreement.

Transferred Projects/Activities (TRF) - Projects that were transferred to another implementing agency before final implementation. (The agency that receives the project should list it as Ongoing until it is completed.) Under most if not all circumstances, such projects should also have an entry under the column entitled “Adjustments” to indicate that un-utilised funds were transferred to another agency and/or bilateral and a date of financial completion; however, expenditures may have been incurred before the project was transferred which will be noted under the column “Funds Disbursed”. No date of completion should be provided except date of financial completion upon approval of the Executive Committee.

***Type** - Projects can be grouped by type of activity with this indicator. Types of projects are listed as follows: country programmes (CPG), demonstration project (DEM), institutional strengthening (INS), investment (INV), project preparation (PRP), technical assistance (TAS), and training (TRA). Some projects may include more than one type of activity. In such cases, a project will be classified according to the following hierarchy: DEM, INV, INS, CPG, PRP, TAS, ~~and~~AND TRA. For example, projects that include a technical assistance component and an investment component are classified as investment projects. Also institutional strengthening that contains technical assistance or training are classified as institutional strengthening projects.

~~**Year of Business Plan** – Identify the year of the business plan in which the projects are included.~~

Year of Contribution – For bilateral agencies only, this is the year to which bilateral contributions were credited.

DATA ENTRY PROBLEMS IN AGENCY PROGRESS REPORTS

31. This uniform format for progress reporting was mandated by the Executive Committee to provide for accuracy and consistency of the format and data entry. This section addresses some of the common errors found in progress reports. Implementing agencies are requested to check their progress report databases to ensure that these common errors are avoided before progress report databases are submitted to the Fund Secretariat. A list of queries to verify agency progress report data inconsistencies is attached in Annex V.

CLOSED PROJECTS (CLO)

Project were closed without final implementation

Required

- *Date of Financial completion*
- *Funds disbursed* should be provided if there is a *first disbursement date*
- *Approved funding* should be provided
- *Adjustment* (amount transferred back) is needed to provide un-utilized funds to be returned at the date of financial completion, this adjustment is recorded in the progress report after approved by the Executive Committee. If adjustments need to be approved, they should be in the progress report narrative under *Adjustments* section.
- *Balance* should be zero
- *Date of completion per proposal* (all projects should have this)

Not required

- *Actual date of completion*
- *Planned commitment in current year*
- *Planned date of completion*
- **ODP phased-out** (exceptional are cases of bankruptcy)

ONGOING PROJECTS (ONG)

Projects under implementation - not classified as Closed, Transferred, Completed, or Financially Completed.

Required

- All projects approved in the reporting period (i.e.: cumulative data to December 31 of the current year).
- *Planned commitment* is required
- *Date of completion per proposal* to determine if the project was completed on time
- *Approved level of funding*
- *Planned date of completion*
- If it has *first disbursement date*, it requires the amount of *funds disbursed* or vice-versa
- Ongoing projects have *18 months for first disbursement date after approval*, otherwise the project is considered as an implementation delays. Such projects should be addressed in the narrative of the report with detailed explanations.
- Ongoing projects that are *planned to be completed over 12 months after the date of the completion of the project proposal* (if the project was included in the last progress report, the delay is calculated on the basis of current planned completion in last progress report) are considered as an implementation delay. Such projects should be presented in the narrative with detailed explanations about the delays.

Not required

- *Actual date of completion*
- *Date of financial completion*

COMPLETED PROJECTS (COM)

Projects that have been commissioned and the ODP has been Phased-out (operational completion)

Required

- *Date of completion per proposal*
- *Estimated disbursement in current year* is required if there is a positive balance
- If the project is completed over 2 years, it should be classified as *financially completed* (Otherwise, reasons for late financial completion should be provided.)
- *First date of disbursement*
- *Actual date of completion*

Not required

- *Planned date of completion* is not required, the cell should be blank
- *Date of financial completion*

FINANCIAL COMPLETED PROJECTS (FIN)

For completed projects only where there is a date of financial completion and all accounts have been finalized

Required

- *Date of financial completion*
- *Actual date of completion*
- *First disbursement date* should also be provided

Not required

- *Planned date of completion*
- *Planned commitment for the current year* (By definition, there cannot be any additional commitments for financially completed projects.)

TRANSFERRED PROJECTS (TRF)

Projects that were transferred to another implementation agency before final implementation

Required

- *Approved level of funding*
- *Adjustment* should be provided to indicate the un-utilized funds were transferred to another agency
- *Funds disbursed* is needed to indicate the funds used before transferring project
- *Date of financial completion* (when books closed and funds transferred)

Not required

- *Actual date of completion*

FORMAT AND DATA ENTRY PROBLEMS

- N/A in any cell. These cells should be blank.
- Two dates of approval in one cell.

- No project number
- Only one meeting date is required, the initial approval date
- Cannot predict *first disbursement date*. First disbursement must occur during reporting period.
- One digit for meeting and project number. It requires at least 2 digits.
For example, if the project number is 1, it becomes 01.
- Any missing entry or incorrect data unless otherwise indicated above.

Annex V

DATA INCONSISTENCIES VERIFICATION

The following queries are used to verify data inconsistencies in the agency progress reports.

Closed Projects (CLO)

- Closed projects without Adjustment and the Balances are not equal to zero
- Closed projects with Adjustment and the Balances are not equal to zero
- Closed projects without Dates of Financial Completion
- Closed projects with Dates Completed Actual
- Closed projects with Planned Dates of Completion
- Closed projects with Estimated Disbursements in Current Year

Completed Projects (COM)

- ~~Projects completed over 1 year should be classified as Financially Completed (FIN)~~
- Completed projects without Dates Completed Actual
- Completed projects with Dates of Financial Completion
- Completed projects with Planned Dates of Completion
- Completed projects with a positive Balances without Estimated Disbursements in Current Year

Financially Completed Projects (FIN)

- Financially completed projects without Dates Completed Actual
- Financially completed projects without Dates of Financial Completion
- Financially completed projects with Estimated Disbursements in Current Year
- Financially completed projects with Planned Dates of Completion

Ongoing Projects (ONG)

- Ongoing projects without Estimated Disbursements in Current Year
- Ongoing projects without Planned Dates of Completion
- Ongoing projects with Dates Completed Actual
- Ongoing projects with Dates of Financial Completion

Transferred Projects (TRF)

- Transferred projects with Adjustments of un-utilized funds and the Balances are not equal to zero
- Transferred projects without Dates of Financial Completion

- Transferred projects with Dates Completed Actual
- Transferred projects with Planned Dates of Completion
- Transferred projects with Estimated Disbursements in Current Year

For All Projects

- Projects without Approved Funding
- Projects that are missing from the Progress Reports
- Projects without Date Approved
- Projects without Date of Completion Per Proposal
- Projects with Funds Disbursed without First Disbursement Dates or vice versa
- Projects with First Disbursement Dates prediction
- Projects without Balances but have Estimated Disbursements in Current Year

Progress Report Data Vs Inventory of Approved Projects

- Compare Progress Reports "ODP to be Phased Out" with Inventory "IMPACT"
- Compare Progress Reports "ODP Phased Out" with Inventory "ODS_PHASEDOUT" for completed projects
- Compare Progress Reports "Approved Funding" with Inventory "FUND_ALLOCATED1"
- Compare Progress Reports "Adjustments" with Inventory "Adjustments"
- Compare Progress Reports "Date Approved" with Inventory "DATE_APPROVAL1"
