EXECUTIVE COMMITTEE OF
THE MULTILATERAL FUND FOR THE
IMPLEMENTATION OF THE MONTREAL PROTOCOL
Seventy-seventh Meeting
Montreal, 28 November - 2 December 2016

Addendum

PROJECT PROPOSAL: RWANDA

This document is being issued to:

- **Add** paragraph 9(bis) as follows:

9(bis). The revised verification report was submitted on 11 November 2016 after document UNEP/OzL.Pro/ExCom/77/59 was issued. The verification report confirmed that the Government is implementing a licensing and quota system for HCFC imports and exports and that the total consumption of HCFC for 2015 was 3.61 ODP tonnes, which is lower than the maximum allowable consumption for that year. The verification concluded that Rwanda was in compliance with the Montreal Protocol and with its Agreement with the Executive Committee. The verifier recommended the necessity to ensure that refrigerant identifiers are distributed and Customs officers trained regularly; to establish regular communication and crosschecking on the import permits issued by the national ozone unit and those presented at the Customs entry points; to ensure that copies of issued licenses are used by endorsing actual imports against allocated quotas; to review and reconcile issued quotas and actual imports; and to ensure that the refrigerants are specified before endorsing the importing permits.

- **Remove** the last sentence of paragraph 13.
- **Replace** paragraph 14(b)(ii) **with** the following:
 - (ii) UNEP will report on the progress in implementing the recommendations in the verification report in the next tranche submission.
