EXECUTIVE COMMITTEE OF  
THE MULTILATERAL FUND FOR THE  
IMPLEMENTATION OF THE MONTREAL PROTOCOL  
Twenty-ninth Meeting  
Beijing, 24-26 November 1999

**Corrigendum**

**BILATERAL COOPERATION**

*Page 2:*

*Add the following additional bilateral cooperation project request for China to the list:*

<u>Project Title</u>	<u>Bilateral Agency</u>
Project preparation of phaseout of use of ODS solvent in production of parts working in high voltage conditions.	France

*Page 5, Table 3:*

*Replace the 'Amount Recommended' column relating to the following three Burkina Faso entries with the following:*

<b>Project title:</b>	<b>Amount Recommended (US\$)</b>
Refrigerant management plan: training of customs	48,025
Refrigerant management plan: technician training	45,200
Refrigerant management plan: recovery and recycling programme	Withdrawn

***Page 8, paras 24-26: Replace the text (relating to the above three projects) with the following:***

24. The Fund Secretariat made some observations on the project proposal, including: reliability of CFC consumption figures in the refrigeration servicing sector and the size and scope of the training programmes and the request for additional recovery and recycling units taking into account the activities so far approved by the Executive Committee for Burkina Faso (a workshop on monitoring and control of ODS consumption through customs officers training, and a training programme for refrigeration repair technicians approved at the 11th ExCom Meeting). Subsequently, the Government of Canada adjusted the costs of the two training programmes.

25. The Government of Canada also submitted a request to implement a supplemental recovery and recycling programme and revolving fund scheme, building upon the approved recovery and recycling programme under UNIDO's implementation. Due to a number of unforeseen issues including the fact that the recovery and recycling project has not been completed, the Government of Canada agreed to defer these requests pending further deliberations between the Government of Burkina Faso and UNIDO relating to disclosure of completion of the previous recovery and recycling project, with the understanding that the project could be re-submitted by the Government of Canada for consideration at a future meeting of the Executive Committee.

## **RECOMMENDATIONS**

26. The Fund Secretariat recommends blanket approval of the subprojects for the training of customs officials, at a level of US \$48,025 and for the 'train the trainers' and technicians in good refrigeration management practices, at a level of US \$ 45,200.

***Page 14, para 54: Add the following text relating to the China solvent project preparation project:***

54. *bis* The Government of France submitted this project preparation request to the 28<sup>th</sup> Meeting of the Executive Committee. The Committee decided to defer consideration of the project pending its submission to the 29th Meeting, at which time the Sub-Committee on Project Review would judge the proposal on its own merits. Based upon such action on bilateral project proposals as might be recommended by the Sub-Committee, the Executive Committee at its 29th Meeting would better clarify the relationship between these projects and China's solvent sector strategy. (Decision 28/31).

## **RECOMMENDATION**

54. *ter* The Fund Secretariat has no issue with the proposal other than its relationship to China's solvent sector strategy, which was dealt with in Decision 28/31.

*Page 15, Table 5: Add the project title and amounts to the table:*

<b>Project Title</b>	<b>Amount Requested (US\$)</b>	<b>Amount Recommended (US\$)</b>
Project preparation of phaseout of use of ODS solvent in production of parts working in high voltage conditions	28,875	28,875

*Page 40, Table 8: Replace the title with the following: “Submissions from the Government of Sweden and Recommendation”*
