EXECUTIVE COMMITTEE OF  
THE MULTILATERAL FUND FOR THE  
IMPLEMENTATION OF THE MONTREAL PROTOCOL  
Twenty-ninth Meeting  
Beijing, 24-26 November 1999

### Corrigendum

#### PROJECT PROPOSALS: TURKEY

*Page 4, para 5: Replace the text with:*

5. The World Bank informed the Secretariat that the project proposal is for the complete elimination of MB (90 ODP tonnes) in the production of strawberry, pepper and eggplant in the East Mediterranean region and in strawberry in Aydin province of Turkey. The phase out of MB is planned on two phases. In phase I, alternative technologies to methyl bromide will be implemented as demonstration to farmers, with a corresponding phase out of 30 ODP tonnes of MB. In phase II, a regional working group for policy development and awareness raising will be established which will ensure that the use of MB for applications covered under this project will be completely phased out. At the end of the project (in 2008), a total of 90 ODP of MB will be phased out.

*Page 4, para 1: Under the title "Recommendation", replace the text and add the following table:*

1. The Fund Secretariat recommends blanket approval of the project with associated support costs at the funding level shown in the table below:

Project Title	Project Funding (US\$)	Support Cost (US\$)	Implementing Agency
Introduction of alternatives to methyl bromide in protected strawberry, pepper and eggplant in East Mediterranean region and in strawberry in Aydin province of Turkey	366,440	47,637	World Bank
