

EXECUTIVE COMMITTEE OF  
THE MULTILATERAL FUND FOR THE  
IMPLEMENTATION OF THE MONTREAL PROTOCOL  
Forty-fifth Meeting  
Montreal, 4-8 April 2005

ODS PHASE-OUT ACTIVITIES IN THE CHILLER SECTOR, INCLUDING CHILLER  
REPLACEMENTS, AWARENESS ACTIONS AND MEASURES FOR THE EFFECTIVE  
USE OF THE RECOVERED REFRIGERANT

Submitted by the Government of Canada

Proposed decision

In reference to a Decision, from the last Meeting of the Parties requesting the Executive Committee to consider funding additional demonstration projects in the chiller sector, the Executive Committee decided funding demonstration projects in the chiller sector based on the following criteria and conditions

1. A maximum five demonstration projects will be funded.
2. A maximum of US\$1million can be requested for each project.
3. No more than three chiller projects should be implemented in each of the following main regions:
  - East Asia
  - West Asia
  - Africa
  - Latin America and the Caribbean
4. Countries selected for projects should not have previously received MFL funds for a chiller project.
5. Countries selected must have at least 5% of their CFC consumption for servicing in the chiller sector.
6. Proposals for chiller demonstration projects should include a comprehensive strategy for managing the entire CFC chiller sector in the countries concerned.
7. Efforts should be made to raise counterpart funding to that provided by the MLF for chiller demonstration projects by the project proponents.
