EXECUTIVE COMMITTEE OF
THE MULTILATERAL FUND FOR THE
IMPLEMENTATION OF THE MONTREAL PROTOCOL
Fifty-sixth Meeting
Doha, 8-12 November 2008

Addendum

PROJECT PROPOSAL: ARGENTINA

Replace paragraphs 28 and 29 **with** the following text:

28. Subsequent to the issuance of this document, the World Bank sent a communication confirming agreement by the Government of Argentina to the level of funding proposed by the Secretariat (i.e., paragraph 26 of document UNEP/OzL/Pro/ExCom/56/22), on the understanding that the Government will have flexibility to use the funding available under the project for activities it deems adequate to achieve the complete phase-out of CFCs in the MDI sector and in accordance with relevant decisions and guidelines of the Multilateral Fund.

RECOMMENDATION

29. Noting that implementation of this project will achieve the complete phase out of CFCs in Argentina, the urgent need to complete the conversion of the MDI sector to non-CFC alternatives, the commitment by Laboratorios Pablo Cassará to stop CFC consumption for non-essential uses and convert to non-ODS substances at its own cost if the proposal to replace CFCs with isobutane is not approved by local health authorities, and in the light of comments by the Secretariat, the Executive Committee may wish to consider approving the project for the phase-out of CFC consumption in the manufacture of MDIs at US \$2,806,874 plus agency support costs of US \$210,516 to the World Bank.
