COMITÉ EJECUTIVO DEL FONDO MULTILATERAL
PARA LA APLICACIÓN DEL
PROTOCOLO DE MONTREAL
Quincuagésima octava Reunión
Montreal, 6 al 10 de julio de 2009

**INFORME SOBRE LA MARCHA DE LAS ACTIVIDADES DE LA ONUDI
AL 31 DE DICIEMBRE DE 2008**

El presente documento incluye:

- Las observaciones y las recomendaciones de la Secretaría del Fondo
- El Informe financiero y sobre la marcha de las actividades de la ONUDI para 2008 (enero a diciembre de 2008)

COMENTARIOS DE LA SECRETARÍA DEL FONDO

Introducción

1. En el presente documento se presentan las observaciones y recomendaciones de la Secretaría del Fondo en relación con el informe sobre la marcha de las actividades de la ONUDI al 31 de diciembre de 2008. Se adjunta dicho informe sobre la marcha de las actividades.

Resumen general de cuestiones

- Se aprobaron 154,9 millones de \$EUA para acuerdos plurianuales a ser ejecutados por la ONUDI y, al 31 de diciembre de 2008, había un saldo remanente de 34,5 millones de \$EUA.
- Se están ejecutando 60 acuerdos plurianuales; cinco acuerdos plurianuales (aprobados hace más de un año) han desembolsado menos de 20 por ciento de los fondos aprobados.
- Diversos acuerdos plurianuales presentan un bajo nivel de desembolso, incluidos los Planes de gestión de eliminación definitiva para Burundi, Eritrea, Guinea, Honduras, México, Niger y Yemen.
- Cabe la posibilidad de que se produzca un cambio en el acuerdo plurianual del Yemen relativo a las alternativas a los hidrocarburos.
- Se ha creado un fondo renovable para el plan de eliminación de CFC de Venezuela.
- Hay siete proyectos, clasificados como proyectos con demoras en la ejecución, sujetos a procedimientos para cancelación de proyectos.
- Se han producido demoras en la preparación de proyecto para el sector de metilbromuro en Serbia y al respecto de la preparación de los Planes de gestión de eliminación de los HCFC para Bahrein, Bosnia y Herzegovina, Qatar, Arabia Saudita, Sudán y el Yemen.
- Quedan pendiente de firmarse documentos y/o la documentación destinados a facilitar la liberación de recursos de fortalecimiento institucional en Bosnia y Herzegovina y Qatar.
- Se han producido demoras continuas en las actividades de bancos de halones en Bosnia y Herzegovina y en Jamahiriya Árabe Libia.

Situación de la ejecución

2. Durante el periodo que abarca este informe (enero a diciembre de 2008), la ONUDI eliminó 1 756 toneladas PAO, y desembolsó aproximadamente 29,2 millones de \$EUA. El Comité Ejecutivo aprobó 29 proyectos de inversión en 2008 para ser ejecutados por la ONUDI, por un valor aproximado de 30,7 millones de \$EUA, lo que debiera resultar en la eliminación de 3 028 toneladas PAO, incluidas 214 toneladas PAO de producción.

3. La ONUDI completó además 32 proyectos de inversión en 2008. En conjunto se terminó un total acumulativo del 85 por ciento (502 proyectos) de los 588 proyectos de inversión aprobados para su ejecución. La ONUDI eliminó el 91 por ciento (64 189 toneladas PAO, incluyendo 17 041 toneladas PAO de producción) de las PAO que tenía que eliminar de su cartera de proyectos aprobados (70 606 toneladas PAO, incluyendo 17 602 toneladas PAO de producción). A finales de 2008 el organismo había desembolsado el 86 por ciento (408,22 millones de \$EUA) de los recursos que le había aprobado el Comité Ejecutivo (475,03 millones de \$EUA), excluyendo los gastos de apoyo al organismo.

4. La ONUDI completó también siete proyectos de asistencia técnica y renovó o creó un total de cuatro proyectos de fortalecimiento institucional durante 2008. Actualmente está ejecutando 58 acuerdos plurianuales basados en el desempeño (acuerdos plurianuales) para los que se aprobaron 9,4 millones de \$EUA en 2008; asimismo, se añadieron en 2008 otros 12 acuerdos plurianuales a la cartera de la ONUDI. Este organismo completó también ocho actividades de preparación de proyecto en 2008.

Marcha de las actividades por país durante 2008

5. En el Anexo I se facilita una evaluación, por país, de las actividades de la ONUDI durante 2008. Este organismo había previsto desembolsos en 62 países o regiones y conseguir una tasa de desembolsos mínima del 85 por ciento de lo previsto en 37 de ellos.

6. Basándose en las fechas de terminación previstas y revisadas que presentó la ONUDI, de conformidad con la Decisión 53/38, y en los resultados presentados en su informe sobre la marcha de las actividades para 2008, la ONUDI completó el 75 por ciento de los proyectos que tenía previsto terminar en 2008, alcanzando el 91 por ciento del grado de eliminación prevista.

Acuerdos plurianuales basados en el desempeño

7. En su informe sobre la marcha de las actividades, la ONUDI incluyó información acerca de los 60 acuerdos plurianuales en proceso de ejecución. Las principales fuentes de información acerca del progreso de estas actividades son los programas de trabajo anuales y los informes conexos sobre la marcha de las actividades.

Desembolso para acuerdos plurianuales

8. La ONUDI se encuentra ejecutando 110 tramos anuales de acuerdos plurianuales con saldos remanentes por desembolsar, lo que se recoge en el Cuadro 1.

Cuadro 1

TRAMOS ANUALES DE ACUERDOS PLURIANUALES

Acuerdo	Fondos aprobados más ajustes (\$EUA)	Fondos desembolsados (\$EUA)	Saldo (\$EUA)	Fondos comprometidos (\$EUA)	Desembolso estimado en año en curso (\$EUA)	Diferencia a desembolsar después de 2009 (\$EUA)

Nota: Las entradas en negrita corresponden a proyectos aprobados hace más de un año con desembolsos inferiores al 20 por ciento. Las entradas en cursiva corresponden a países cuyos proyectos fueron aprobados hace menos de un año, con desembolsos inferiores al 20 por ciento.

9. De los 154 912 364 \$EUA de fondos aprobados para tramos anuales de acuerdos plurianuales, la ONUDI ha desembolsado 122 845 557 \$EUA (79 por ciento), por lo que queda un saldo de 32 066 807 \$EUA. De este saldo se espera desembolsar 13 146 429 \$EUA (41 por ciento) en 2009. La ONUDI notificó desembolsos inferiores al 20 por ciento de los fondos aprobados para 14 acuerdos plurianuales, cinco de los que ya se habían aprobado hace más de un año. Se notificó que a finales de 2008 el desembolso para algunos acuerdos plurianuales era nulo o casi nulo, como consecuencia fundamentalmente del hecho de que fueron aprobados en la segunda o la tercera reuniones de 2008. Entre ellos se incluyen planes de eliminación de SAO o CFC en Burundi, Eritrea, Guinea, Honduras y Niger. Algunos de tales proyectos (tales como los de Benin, México, la República del Congo y el Yemen) ya han comenzado a desembolsar porcentajes significativos de fondos en 2009.

10. En lo que atañe al Plan de gestión de eliminación definitiva en Benin, se organizó una misión conjunta ante el PNUMA y la ONUDI para comenzar en octubre de 2008, acordándose las modalidades de ejecución. Si bien ya se ha desembolsado un mayor grado de fondos, los bajos niveles del desembolso inicial fueron el resultado de las demoras en comenzar y el tiempo que fue necesario para finalizar la lista de equipos. El PNUMA organizará la capacitación pertinente tras recibir dichos equipos. El retraso inicial en el desembolso del proyecto de la República del Congo (Brazzaville) fue consecuencia de un largo proceso para conseguir la autorización de los abastecimientos. No obstante, los desembolsos comenzaron en 2009 y se estima que el grueso de los fondos ya se han desembolsado.

11. La ONUDI informó de que la lentitud en el desembolso de los fondos fue consecuencia de su conexión con las actividades de otros organismos. Por ejemplo, en el caso del Plan de gestión de eliminación definitiva (primer tramo) en Burundi (aprobado en julio de 2008), la ONUDI señaló que se encontraba a la espera de recibir orientaciones del PNUMA antes de proceder a comprar los equipos.

12. Otra de las razones alegadas para justificar los bajos niveles de desembolso fue el incumplimiento de las decisiones del Comité Ejecutivo en un país dado. La ONUDI notificó que no se había desembolsado fondo alguno respecto del Plan de gestión de eliminación definitiva de los CFC en Eritrea (aprobado en abril de 2008) dado que tales desembolsos no estaban permitidos por no haberse implantado el sistema de concesión de licencias. La ONUDI señaló que sus esfuerzos para solventar este problema no han tenido éxito.

13. La ONUDI notificó también que el lento desembolso con miras al Plan de gestión de eliminación definitiva (primer tramo) en Guinea (aprobado en julio de 2008) estaba ligado a la ejecución de un

programa de capacitación por parte del PNUMA, y que el desembolso para el plan de gestión de eliminación definitiva (primer tramo) en Honduras (aprobado en julio de 2008) estaba pendiente de que el PNUMA terminara el Plan de gestión de refrigerantes en el país.

14. El Comité Ejecutivo puede estimar oportuno solicitar informes adicionales del estado en que se encuentran los Planes de gestión de eliminación definitiva en Burundi, Eritrea, Guinea, Honduras y Níger para su examen en la 59ª Reunión.

Posible enmienda del acuerdo plurianual

15. En el caso del plan nacional de eliminación de SAO (primer tramo) en el Yemen (YEM/PHA/55/INV/28, aprobado en julio de 2008), no se aportó razón alguna que justificara el bajo nivel de desembolso. La ONUDI se dirigió a la Secretaría de Fondo Multilateral con objeto de aclarar si era necesario enmendar el acuerdo para poder abordar la fusión de las cinco empresas que hacen uso de hidrocarburos en el Yemen.

16. Los equipos destinados a los componentes del proyecto de servicio, mantenimiento y fabricación de equipos de refrigeración de adquirieron a finales de diciembre de 2008. Se contrató a un perito especializado en espumas, el cual visitó el Yemen a primeros de diciembre de 2008 para evaluar la situación en la que se encontraban las 10 empresas de refrigeración comercial y para estudiar la viabilidad de implantar tecnología de hidrocarburos. El Gobierno se encuentra sopesando la fusión de 5 empresas y el dotarlas con maquinaria de hidrocarburos, mientras que el resto de las empresas recibirán maquinarias de consumo de HCFC. La Secretaría señaló que la ONUDI podía optar por la conversión a condición de que fuera conforme con la cláusula de flexibilidad (Decisión 46/37) o, por otra parte, podría proponer la enmienda del acuerdo en el contexto de próximo plan anual que se presente.

Fondo renovable para el plan nacional de eliminación de CFC de Venezuela

17. La ONUDI ha notificado que el programa de recuperación y reciclaje se encuentra plenamente operativo en el marco del plan nacional de eliminación de CFC. Se han instalado equipos de recuperación en las instalaciones de PRODUVEN y están funcionando como parte del sistema de recuperación y reciclaje. Hasta la fecha se ha capacitado a 4 395 técnicos en refrigeración y 3 889 se han titulado. La instalación piloto funciona a pleno rendimiento. Se implantará un programa de enfriadores que se basará en un programa de incentivos y fondos renovables. Se continuará con los sistemas de notificación y supervisión de datos, y el programa de certificación y capacitación de técnicos.

18. A fin de implantar el fondo renovable en Venezuela se seleccionará un banco comercial y se elegirá una empresa auditora para evaluar el sistema. En respuesta a una cuestión planteada por la Secretaría, la ONUDI indicó que tenía experiencia en la implantación de proyectos con fondos renovables. La ONUDI indicó que actualmente se encuentra ejecutando tres proyectos conexos al consumo energético en colaboración con el Fondo para el Medio Ambiente Mundial (FMAM) (en Zambia, Cuba y Senegal) que conllevan fondos renovables.

Proyectos individuales

19. Esta sección se ocupa de los proyectos individuales sujetos a demoras en su ejecución y a procedimientos de preparación de proyecto, y cancelación de proyecto, e incluye un enfoque que se centra en el estado de la preparación de los Planes de gestión de eliminación de los HCFC.

Demoras en la ejecución

20. Habida cuenta de todos los proyectos eliminados de la lista, de conformidad con las decisiones del Comité Ejecutivo, quedan 7 proyectos que muestran demoras en la ejecución. Cuatro de ellos están también clasificados por haber sufrido demoras de ejecución en 2007. Durante 2008 la ONUDI tuvo menos proyectos clasificados con demoras de ejecución que en 2007, año en el que fueron 12 los proyectos que quedaron así clasificados. Puede que el Comité Ejecutivo desee tomar nota de que la ONUDI notificará a la 59ª Reunión de hasta siete proyectos con demoras de ejecución, incluidos cuatro que ya quedaron clasificados como tales en 2007.

Posibles demoras en la preparación de proyectos

21. La preparación de proyecto para el sector de fumigantes (metilbromuro) en Serbia (YUG/FUM/45/PRP/26) se aprobó hace ya más de tres años y la mayoría de los fondos se han utilizado para establecer los niveles de consumo. Sin embargo, la ONUDI señaló que se están celebrando conversaciones con el Gobierno acerca de la posible preparación de proyectos. No está claro si del proyecto de investigación emanará una preparación de proyecto para el sector de consumo de metilbromuro en Serbia. Puede que el Comité Ejecutivo considere oportuno solicitar un informe adicional sobre la situación actual para su presentación a la 59ª Reunión con miras a supervisar la marcha.

Preparación de proyecto de Plan de gestión de eliminación de los HCFC

22. La ONUDI se encuentra ejecutando 39 proyectos para la preparación de Planes de gestión de eliminación de los HCFC. Varios de estos proyectos muestran que su avance hace sido lento y muchos de ellos tienen como fecha de terminación el mes de diciembre de 2009.

23. Se dan varios casos en los que la preparación del proyecto se aprobó en julio de 2008, sin que se haya desembolsado fondo alguno hasta la fecha. En esta situación se encuentran Bahrain (BAH/PHA/55/PRP/20), Bosnia y Herzegovina (BHE/PHA/55/PRP/23), Qatar (QAT/PHA/55/PRP/11), Arabia Saudita (SAU/PHA/55/PRP/05) y el Yemen (YEM/PHA/55/PRP/29).

24. Parece ser que la cooperación entre organismos puede ser un factor constituyente de la demora en la ejecución de tales Planes de gestión de eliminación de los HCFC, así como el desembolso de los fondos. En varios de los casos específicos anteriores (Qatar, Arabia Saudita y Yemen) la ONUDI notificó que trabaja conjuntamente con el PNUMA para ejecutar tales planes. En todos los casos, y como respuesta a las cuestiones planteadas por la Secretaría sobre el estado de las tareas legislativas conexas, la ONUDI respondió que la responsabilidad por el elemento del Plan en cuestión era el PNUMA. Además, la ONUDI notificó que en lo que a Bahrein (BAH/PHA/55/PRP/20) respecta, cuyo plan que se aprobó en julio de 2008 y para que el no se han desembolsado aún fondos, la responsabilidad por la contratación de peritos nacionales y por abordar el componente legislativo atinente al Plan de gestión recae en el PNUMA.

25. Otra posible causa de los retrasos parece ser la falta de actividad por parte de la Dependencia Nacional del Ozono. En el caso de Bosnia y Herzegovina (BHE/PHA/55/PRP/23), plan que se aprobó en julio de 2008 con una fecha de terminación prevista para diciembre de 2009 y para el que no se ha desembolsado aún fondo alguno, la ONUDI notificó que se ha enviado el mandato a la Dependencia Nacional del Ozono con miras a poder identificar asesores. Así pues, parece desprenderse que la falta de contratación de un asesor está ligada a las demoras sufridas por dicha dependencia.

26. En lo tocante al Plan de gestión de eliminación de los HCFC de Sudan (SUD/PHA/55/PRP/21), que se aprobó en julio de 2008 con una fecha de terminación de diciembre de 2009, sólo se han desembolsado 60 \$EUA. No está claro si ha habido contrataciones o no.

27. La ONUDI informó de que la fecha de terminación prevista para la preparación del proyecto de China (CPR/PHA/55/PRP/470) se cambió al mes de abril de 2010 dado que este país es, con mucho, el mayor consumidor de HCFC de los países que operan al amparo del Artículo 5 y, dado el grado de coordinación necesario entre los organismos para acometer tal Plan de gestión de eliminación de los HCFC, la ONUDI notificó que un año no era tiempo suficiente para terminar el proyecto.

28. En los casos en los que la marcha de las actividades para la eliminación de los HCFC está clara, como es el caso de Egipto (EGY/PHA/55/PRP/96), la ONUDI ha informado que ello se debe a la rápida contratación de peritos nacionales y al alto grado de respuesta de la Dependencia Nacional del Ozono y de los ministerios gubernamentales pertinentes. Así pues, parece desprenderse que la oportuna cooperación de las autoridades nacionales ayuda a agilizar a la ejecución de los Planes de gestión de eliminación de los HCFC.

29. El Comité Ejecutivo puede considerar oportuno solicitar informes adicionales de situación sobre las actividades preparativas del Plan de gestión de eliminación de los HCFC en Bahrein (BAH/PHA/55/PRP/20), Bosnia y Herzegovina (BHE/PHA/55/PRP/23), Qatar (QAT/PHA/55/PRP/11), Arabia Saudita (SAU/PHA/55/PRP/05), Sudán (SUD/PHA/55/PRP/21) y el Yemen (YEM/PHA/55/PRP/29).

Proyectos de fortalecimiento institucional, metilbromuro, bancos de halones y refrigerantes

30. La presente sección aborda proyectos de fortalecimiento institucional, metilbromuro, bancos de halones y refrigerantes que no están sujetos a supervisión mediante informes de demora de la ejecución y, por lo tanto, no se ven sometidos a los procedimientos pertinentes a la cancelación de proyectos. La Secretaría examina la información de la base de datos que presentan los informes sobre la marcha de las actividades que facilitan los organismos a fin de determinar si tales proyectos sufren dificultades, tras lo que sugiere posible medidas a tomar para que el Comité las examine. Esta sección atiende también a la información sobre los proyectos de refrigerantes. Dichos proyectos los examina también el Jefe interino responsable de la evaluación y la supervisión, como se recoge en el documento UNEP/OzL.Pro/ExCom/58/9.

Proyectos de fortalecimiento institucional

31. La ONUDI se encuentra ejecutando proyectos de fortalecimiento institucional, por los que se crearon Dependencias Nacionales del Ozono en los 11 países que siguen: Bosnia y Herzegovina, Egipto, Jamahiriya Árabe Libia, México, Montenegro, Omán, Qatar, Serbia, la República Árabe Siria, la ex República yugoeslava de Macedonia, y Turkmenistán. La ONUDI indicó que se han experimentado avances en los proyectos de Egipto, Jamahiriya Árabe Libia, México, Montenegro, Omán, Serbia, la República Árabe Siria, la ex República yugoeslava de Macedonia y Turkmenistán.

32. El organismo notificó nuevamente en el presente año en curso que, en lo atinente al proyecto de fortalecimiento institucional de Bosnia y Herzegovina (BHE/SEV/43/INS/19), el documento del proyecto aún no se había firmado, a pesar de sus mejores esfuerzos. La ONUDI señaló que tenía previsto realizar una misión en 2009 para reavivar la ejecución del proyecto.

33. En el caso de Qatar, el inicio del proyecto de ejecución de fortalecimiento institucional (QAT/SEV/49/INS/08) se ha demorado como consecuencia del incumplimiento de las prescripciones de

notificación de la ONUDI en el proyecto anterior (fase I, financiación del primer año). La ONUDI notificó que la demora se debía al largo proceso para obtener una firma en dicho país y a los retrasos de notificación en el marco del contrato vigente de la ONUDI. En abril de 2008 se seleccionó un perito para la Oficina de gestión de proyectos, enviándose el contrato pertinente, si bien, éste no se ha recibido aún de vuelta en la ONUDI debidamente refrendado.

34. Puede que el Comité Ejecutivo estime oportuno pedir a Bosnia y Herzegovina y a Qatar que agilicen el proceso de firma de los acuerdos pertinentes y faciliten todos los documentos conexos que fueren necesarios para poder desembolsar los fondos destinados a los proyectos de fortalecimiento institucional, así como solicitar informes adicionales de la situación sobre los proyectos de fortalecimiento institucional en Bosnia y Herzegovina (BHE/SEV/43/INS/19) y Qatar (QAT/SEV/49/INS/08) para su presentación a la 59ª Reunión.

Proyectos relativos al metilbromuro

35. La ONUDI se encuentra ejecutando 16 actividades relativas al metilbromuro, incluyendo dos de asistencia técnica, cinco de preparación de proyecto, ocho proyectos de inversión y uno de demostración. Parece que las actividades avanzan satisfactoriamente. Las actividades de preparación de proyecto para Argelia y Túnez permanecerán activas hasta encontrar una alternativa adecuada al metilbromuro para los dátiles con alto contenido de humedad.

Proyectos de eliminación de halones

36. La ONUDI se encuentra ejecutando proyectos de eliminación de halones en Bosnia y Herzegovina, Jamahiriya Árabe Libia, Kuwait y Omán. Dicha eliminación se alcanzará el 1 de enero de 2010. Algunos de estos proyectos no se han iniciado aún o se encuentran en las fases iniciales de ejecución.

37. En lo que respecta al proyecto de eliminación de halones en Bosnia y Herzegovina (BHE/HAL/42/TAS/18), la ONUDI informó de que se habían desembolsado 14 181 \$EUA de los 64 600 \$EUA aprobados para el proyecto en abril de 2004. Si bien estaba previsto terminar el proyecto el año pasado, está sufriendo demoras. Ya se ha finalizado la fase de abastecimiento de equipos en los planos nacional e internacional. La licitación comenzará una vez solventadas las cuestiones sobre la autorización aduanera para que pasen los abastecimientos y la exención del IVA.

38. El proyecto de plan para la eliminación de las importaciones y el consumo neto de halones en el sector de la lucha contra incendios en la Jamahiriya Árabe Libia (LIB/HAL/47/TAS/26) se aprobó a condición de que se preparara un plan administrativo (Decisión 47/11). Dicha condición se reiteró en la Decisión 53/12. La ONUDI notificó el año pasado que estaba en curso la selección de una entidad para hacer de anfitrión de los equipos relativos a los halógenos y que, tras dicha selección, se prepararían directrices pormenorizadas para el plan de sostenibilidad y comenzarían las actividades de ejecución del proyecto. No obstante, la entidad inicialmente seleccionada para actuar de anfitriona de los equipos para los bancos de halones no consiguió la aprobación del Ministerio de Industria. Se ha sugerido ya otra entidad (una empresa de hierros y aceros) y se está verificando su idoneidad.

39. Puede que el Comité Ejecutivo estime oportuno solicitar informes adicionales sobre la situación de los proyectos de eliminación de los halones en Bosnia y Herzegovina (BHE/HAL/42/TAS/18) y la Jamahiriya Árabe Libia (LIB/HAL/47/TAS/26).

Proyectos de gestión de refrigerantes

40. La ONUDI notificó avances en los tres proyectos de gestión de refrigerantes en las tres regiones que se indican seguidamente:

- Europa Oriental (Croacia, la ex República yugoslava de Macedonia, Montenegro, Rumania y Serbia);
- África (Camerún, Egipto, Namibia, Nigeria y Sudán); y
- Asia Occidental (la República Árabe Siria).

41. El organismo notificó que a finales de 2008 se había desembolsado el 42 por ciento de los fondos aprobados y el 74 por ciento de los mismos estaban comprometidos, y que los proyectos disponían de cofinanciación apalancada. En el caso de la República Árabe Siria, los fondos conseguidos de la cofinanciación (270 000 \$EUA) superaron considerablemente el nivel de financiación originalmente previsto (27 165 \$EUA).

42. La ONUDI notificó que, en lo tocante a Europa, los ocho enfriadores destinados a Croacia, Montenegro, Rumania y la ex República yugoslava de Macedonia, así como los dos enfriadores destinados a Servia, se habían entregado e instalado a finales de 2008. Así mismo el organismo informó que, en el caso de la República Árabe Siria, se habían cambiado los tres enfriadores objeto del ejercicio y que estaba en curso el reacondicionamiento de otros cuatro.

RECOMENDACIONES

43. El Comité Ejecutivo quizás estime oportuno:

- a) Tomar nota del informe de la ONUDI sobre la marcha de las actividades que se recoge en el documento UNEP/OzL.Pro/ExCom/58/14;
- b) Solicitar informes adicionales sobre la situación atinente a los proyectos que se indican seguidamente y su presentación a la 59ª Reunión:
 - i) Los Planes de gestión de eliminación definitiva en Burundi, Eritrea, Guinea, Honduras y Niger;
 - ii) La preparación de proyecto para el sector de fumigantes (metilbromuro) en Serbia (YUG/FUM/45/PRP/26);
 - iii) Las actividades de preparación de los Planes de gestión de eliminación de los HCFC en Bahrein (BAH/PHA/55/PRP/20), Bosnia y Herzegovina (BHE/PHA/55/PRP/23), Qatar (QAT/PHA/55/PRP/11), Arabia Saudita (SAU/PHA/55/PRP/05), Sudán (SUD/PHA/55/PRP/21) y el Yemen (YEM/PHA/55/PRP/29);
 - iv) Fortalecimiento institucional en Bosnia y Herzegovina (BHE/SEV/43/INS/19);
 - v) Fortalecimiento institucional en Qatar (QAT/SEV/49/INS/08);
 - vi) Proyecto de banco de halones en Bosnia y Herzegovina (BHE/HAL/42/TAS/18);

- vii) Proyecto de banco de halones en Jamahiriya Árabe Libia (LIB/HAL/47/TAS/26);
- c) Tomar nota de que la ONUDI presentará información a la 59ª Reunión sobre un máximo de siete proyectos con demoras de ejecución en 2008, incluidos cuatro proyectos que quedaron así clasificados en 2007;
- d) Pedir Gobierno de Bosnia y Herzegovina que agilice la firma del documento del proyecto para facilitar el desembolso de los fondos destinados al proyecto de fortalecimiento institucional (BHE/SEV/43/INS/19); y
- e) Pedir al Gobierno de Qatar que agilice la firma de los acuerdos pertinentes y facilite todos los documentos conexos que fueren pertinentes a fin de facilitar el desembolso de los fondos destinados al proyecto de fortalecimiento institucional (QAT/SEV/49/INS/08).

I. Project Approvals and Disbursements

Annual summary data

- 1) Table 1 “Annual Summary” includes the most important annual data, such as number of approvals, corresponding ODP (wherever applicable), approved funding, adjustment and disbursement characteristics. The cumulative funds for the period 1993-2008 approved for UNIDO activities under the Multilateral Fund amount to US\$ 475,032,521, excluding agency support cost and the core unit funding. This amount, however, includes the adjustments made until end 2008. The details are contained in the attached database printout (Annex II). In this printout, the data are sorted by regions and within each region the completed, financially completed, ongoing and closed (cancelled) projects are listed.
- 2) As of 31 December 2008, UNIDO’s cumulative disbursement for all projects (completed and ongoing) amounts to US\$ 401,223,272 excluding agency support cost and core unit funding. This corresponds to a delivery rate of 84.0 per cent. Out of this amount, US\$ 366,358,564 relate to cumulative disbursement for investment projects (Table 2, “Summary Data by Project Type”). This represents 85 per cent of the total value of investment project approvals including adjustments as of December 2008.

Interest

- 3) The interest earned for the period 1993 – 2008 amounts to US\$ 34,465,970 and is shown by years in the Table 1 “Annual Summary”. The interest earned in 2008 amounts to US\$ 2,069,908.

Summary data by type

- 4) The cumulative activities of UNIDO approved by the Multilateral Fund are listed in Annex II.

The following table shows their breakdown by types.

Type	US\$*	Share of portfolio in per cent	Number of projects
CPG (Country Programme Preparation)	815,000	0.2	11
DEM (Demonstration projects)	10,685,007	2.2	22
INS (Institutional strengthening)	4,776,760	1.0	25
INV (Investment projects)	429,231,335	90.4	502
PRP (Project preparation)	16,282,895	3.4	330
TAS (Technical Assistance)	11,977,422	2.5	81
TRA (Training)	1,249,459	0.3	23
Total (excluding agency support cost)	475,017,878	100	994

* These figures are without adjustments, which are in total US\$ 14,643.

- 5) Table 2 “Summary of Data by Project Type”, shows approvals, adjustments and disbursements by type of project/activity.

- 6) Table 2 “Summary of Data by Project Type”, shows approvals, adjustments and disbursements by type of project/activity.
- 7) Disbursements by activity type and as percentage of activity allocations are as follows:

Type	US\$	Disbursement rate in per cent
CPG (Country Programme Preparation)	721,844	99
DEM (Demonstration projects)	8,558,423	84
INS (Institutional strengthening)	3,863,243	80
INV (Investment projects)	366,358,564	85
PRP (Project preparation)	9,851,271	70
TAS (Technical Assistance)	10,673,392	91
TRA (Training)	1,196,535	100
Total (excluding agency support cost)	401,223,272	84

- 8) In 2008 UNIDO’s overall disbursement rate (excluding agency support cost) was 84%, which is similar to the cumulative disbursement rate of previous years. It is to be noted that in 2008 UNIDO had an approval of US\$ 34,002,477 net of support costs and core unit funding. Out of this amount, US\$ 29.4 million were approved at the last two (55th and 56th) ExCom Meetings of 2008 and thus, considerable amount of these projects were not ready for substantial disbursement in 2008. The funds approved at the 55th and 56th ExCom Meetings represent 39.6 % of UNIDO’s undisbursed balance of US\$ 73.8 million. The disbursement rate of projects approved until the 55th ExCom amounts to 90 %.

In the reporting year, twelve new multi-year performance based projects were approved, while one National ODS Phase-out Plan for Iraq is under preparation. Thus, the total number of ongoing multi-year performance based agreements amounts to 58.

Multi-Year Agreements

- 9) The twelve new performance based, multi-year projects approved for UNIDO’s implementation in 2008 are as follows:
- National Phase-out Plan for Yemen;
 - National methyl bromide phase-out plan for Mexico and Morocco
 - Terminal Phase-out Management Plan for Benin, Burundi, Cote d’Ivoire, Eritrea, Guinea, Honduras, Niger, Republic of Congo and Sao Tome and Principe, ;
- 10) As shown in Annexes II and III, UNIDO is implementing fifty-eight performance-based, multi-year agreements. Six of these agreements are national phase-out plans (NPPs) in Albania, Algeria, Bosnia & Herzegovina, Saudi Arabia, Sudan and Yemen, ten are related to the methyl bromide sector (China, Honduras, Lebanon, Libya, Mexico, 2 in Morocco, Syria, Turkey and Zimbabwe), four agreements in the solvent sector (DPRK, India, Nigeria & Pakistan), thirty three agreements are for CFC phase-out, in LVCs and non-LVCs, in Algeria (RMP), Argentina, Benin, Burundi, Cameroon (CFC+TCA), China (2), Congo, Cote d’Ivoire, Croatia, DPR Korea, Egypt, Eritrea, Guinea, Honduras, India, Iran, Kuwait, Libya, Macedonia, Madagascar, Mexico, Montenegro, Nigeria, Oman, Pakistan, Qatar, Romania, Sao Tome and Principe, Serbia, Syria and Venezuela. UNIDO has been implementing four production sector phase-out agreements in China, DPR Korea, Mexico and Romania; and last but not least the phase-out of CFCs in the use of tobacco-fluffing industry in China.

- 11) The total funds committed by the ExCom for these agreements amount to US\$ 168,453,034. From this amount, US\$ 153,505,853 has already been released (including approvals at the 57th ExCom Meeting in April 2008), out of which, US\$ 120,718,505 was disbursed (as of 31 December 2008).
- 12) The total ODS to be phased out through ongoing multi-year agreements amounts to 27,431 ODP tonnes of consumption; plus 17,778 ODP tonnes of production. Out of these amounts, 19,273 ODP tonnes of consumption and 16,690 ODP tonnes of production have been phased out by end 2007. The allowed ODS consumption for the reporting year was 6,844 ODP tonnes. Verified Article 7 consumption data for 2008 are not yet available in most of the countries. Based on preliminary data received from some of the countries, the actual consumption phase-out in 2008 amounted to about 2,401 ODP tonnes. Should the other countries phase-out more than their targets specified in their respective agreements; additional ODP phase-out would be achieved.
- 13) The majority of the multi-year performance based agreements under UNIDO's implementation are progressing well, 8 agreements have been successfully completed; the overall disbursement rate has steadily increased during the recent years (from 65% in 2006 to 72% in 2007 and 79% in 2008). In addition, fifteen tranches were submitted and approved by the ExCom in 2008.

Detailed information on these multi-year projects is to be taken from Annex III.

Sector phase out by country

- 14) This section indicates sectors by countries for which total phase-out has been funded. Most of the activities are multi-year performance based projects, however there are some individual projects phasing out one or more substances in a particular sector. These activities are listed in the table below:

#	Country	Sector/Project	ODS	Multi-year yes/no	Phase-out in sector
1	Albania	National Phase-out Plan (NPP)*	All	Yes	Total
2	Algeria	Technical assistance to phase-out MeBr in pulses disinfections	MeBr	No	Total
3	Algeria	National phase-out plan	CFC/TCA	Yes	Total

* In cooperation with bilateral and/or implementing agencies

15) Information on funded ODP phase-out by region/country for ongoing projects is given in Table 3 “ODP Phase-out by Region, Country and Sector – Ongoing Projects”.

16) As per table 3a “ODP Phase-out by Region, Country and Sector – Completed Projects”, until end of the reporting period, UNIDO eliminated 53,109.0 tonnes (excluding partial phase-out of ongoing projects). ODP phase by sector is summarized in the below table.

Completed projects	
Sector	ODP tonnes
Aerosols	3,478.9
Foams	12,686.3
Fumigants	2,492.0
Halons	1,991.8
Other (Tobacco)	1,020.0
Process agents	820.4
Phase-out	2,929.2
Production	10,302.0
Refrigeration	15,307.8
Several	39.3
Solvents	2,041.3
Total	53,109.0

17) Partial ODP phase out is reported in Table 3b “Partial ODP Phase-out by Sector, Region, Country” and in Annex III. The partial phase-out achieved in 2008 is shown in the following table on a sectorial basis.

Partial phase-out in 2008*	
Sector	ODP tonnes
Aerosols	25.0
Fumigants	220.1
Process agents	50.0
Projects with PHA code	333.0
Refrigeration	32.8
Solvents	54.36.0
Total	715.2

* Projects/tranches completed in 2008 are excluded

II. Project Completion since last Report

ODP phased out since last report - investment projects

- 18) As per Table 4, the cumulative ODP phase out through investment projects completed in the reporting period (1 January – 31 December 2008) amounts to 4,089.9 ODP tonnes (including production sector). In addition, 715.2 ODP tonnes were partially phased-out from ongoing projects. The details are shown in Table 3b, Table 4. Table 4 lists all investment, demonstration, recovery and recycling, technical assistance and institutional strengthening projects completed in 2008.
- 19) In 2008 no projects were cancelled under UNIDO's implementation.

Non-investment project completions since last report

- 20) Since the last report, 19 non-investment projects, with an approved funding of US\$ 841,847 were completed; eight in Africa, two in Asia and the Pacific, three in Latin America and the Caribbean, and five in Europe.

III. Global and Regional Project Highlights

Global Projects

- 21) In 2008 one global project was approved for UNIDO, which is the core unit funding for 2009 in the amount of US\$ 1,857,636.

Regional Projects

- 22) During the reporting period no new regional projects were approved. Implementation of the regional chiller programmes in Africa and Europe are ongoing and are progressing well. A detailed status report on these projects was submitted to the 56th ExCom's consideration.

Chiller Projects

- 23) A funding window of US \$15.2 million for the chiller sector was approved at 45th Meeting. UNIDO submitted 2 proposals to the 47th and one to the 48th ExCom Meeting, and all three projects were positively considered. In total US\$ 2.4 million has been approved for UNIDO's implementation.
- 24) UNIDO is implementing chiller projects in three different regions:
- in Eastern Europe (Croatia, FYR of Macedonia, Montenegro Romania and Serbia);
 - in Africa (Cameroon, Egypt, Namibia, Nigeria and Sudan)
 - in West Asia (Syria)
- 25) By the end of 2008, 42 % of the approved funds have been disbursed and 74% of the funds have been implemented. The implemented projects have been successful in leveraging more co-funding than originally expected. In the case of Syria, the funds realized from co-financing significantly exceeded the originally foreseen amount (US \$270,000 compared to US \$27,165 planned).

- 26) The operational outcome of the projects is very positive. In Europe, all 8 chillers in Romania, Macedonia, Croatia and Montenegro have been delivered and installed by end 2008. Two chillers in Serbia have been delivered and installed. In Syria, all three chillers targeted were replaced in and retrofiting was in progress for the other four chillers.
- 27) The project in the Africa region is being co-implemented with France, Germany and Japan. Since approval, the project has been expanded to six countries from the original five. External funding was secured from the French Global Environment Facility (FGEF). The challenge to introduce to the FGEF the concept of linking the Kyoto and Montreal Protocols through the replacement of CFC based chillers with energy efficient, non-CFC based chillers could overcome with support of the French Environment Ministry. The project includes a component to elaborate a chiller replacement policy and replicate the results of the demonstration.

IV. Performance Indicators

Agency's Business Plan Performance Goals

- 28) The ExCom at its 41st Meeting approved new performance indicators in its Decision 41/93. These performance indicators were first applied in UNIDO's 2004 Business Plan. The ExCom at its 47th Meeting, by Decision 47/51, revised the weightings for quantitative performance indicators. The new weightings have been applied since the evaluation of the 2005-year performance. The targets and achievements for the year 2008 performance indicators approved during the 54th meeting of the ExCom are indicated below.

A1. Approvals

Number of annual programmes of multi-year agreements approved

- 29) In 2007, 12 new and 15 annual programmes of existing multi-year projects were approved, which represents 90 % achievement of the target set by the ExCom.

Number of individual activities (INV, RMPs, halon banks, TAS) approved vs. those planned

- 30) During 2008, 47 individual projects were approved against the target of 55. This represents 85 % achievement. The approvals include 4 institutional strengthening, 1 demonstration, 3 investment, 1 technical assistance and 38 HPMP projects.

A2. Implementation

Milestone activities completed (e.g. policy measures, regulatory assistance)/ODS levels achieved for approved MY annual tranches vs. those planned

- 31) Milestone activities have been completed for altogether 27 MY performance-based agreements against the target of 19, thus, achieving 142 % performance. This includes the completion of milestones for the approved 15 MY annual tranches, plus 12 ongoing MY Agreements for which no more funding tranches are available.

ODS phased-out for individual projects vs. those planned in progress reports

- 32) 801.7 ODP tonnes were phased-out in 2008 from individual projects. This represents achievement of 105 % against the target of 762.9 ODP tonnes, set by the ExCom.

Project completion for investment and non-investment projects vs. those planned in progress reports

- 33) 20 investment and non-investment projects were completed in 2008 against the target of 19, which represents 105 % achievement of the target.

Policy/regulatory assistance completed vs. that planned

- 34) In 2008, policy/regulatory activities were completed as planned. The target was achieved at the level of 100 %

A3. Administrative

Speed of financial completion vs. that required per progress report completion dates

- 35) The target set by the ExCom was 12 months and in 2008 UNIDO managed to financially complete its projects within 7.8 months in average (for projects, which were completed 12 months ago between January and December 2007).

Timely submission of PCRs vs. those agreed

- 36) All PCRs were submitted on time as agreed with the Senior Monitoring and Evaluation Officer.

Timely submission of progress reports

- 37) UNIDO submitted its Progress Report 2008 before deadline, on 29 April 2009. This follows UNIDO's practice, whereby progress reports never reached the Secretariat later than the established deadline.

38) The performance indicators with the weightings are summarized in the following table:

Performance indicators: Targets and achievements in 2008

Performance indicator	Weighting	Targets UNIDO BP 2008	Achievements as per P&F Report 2008	P&F vs. BP (remarks wherever applicable)
Approvals				
No. of annual programmes of MY agreements approved vs. those planned	15	30	27	90 %
No. of individual activities (INV, RMPs, halon banks, TAS) approved vs. those planned	10	55	47	85 %
Implementation				
Milestone activities completed (e.g. policy measures, regulatory assistance)/ODS levels achieved for approved MY annual tranches vs. those planned	20	19	27	142 %
ODS phased-out for individual projects vs. those planned in progress reports	15	762.9 ODP tonnes	801.7 ODP tonnes	105 %
Project completion for inv and non-inv projects vs. those planned in progress reports	10	19	20	105 %
Policy/regulatory assistance completed vs. that planned	10	9	9	100 %
Administrative				
Speed of financial completion vs. that required per progress report completion dates	10	12 months	7.8 months	On time
Timely submission of PCRs vs. those agreed	5	On time	100 % on time	100 % on time
Timely submission of progress reports & responses	5	On time	Before deadline (29 Apr 2009)	Before deadline

In addition to the above,

- UNIDO's approvals in 2008 amounted to US\$ 38,429,738 against the 2008 Business Plan of US\$ 47,937,000. This level of approval represents 80 % achievement.
- US\$ 25,346,405 was disbursed for projects under UNIDO's implementation against the target of US\$ 27,836,073, which represents 91% achievement
- At the end of 2008, 4,090 ODP tonnes were phased out for projects completed in 2008 and additional 715 ODP tonnes were partially phased-out through ongoing projects.

39) Based on the new performance indicator regime, the specific performance indicators for non-investment projects have been eliminated.

Policy and legislative measures supported by UNIDO in 2008

As stated in UNIDO's 2008 Business Plan, UNIDO was planning to provide policy assistance to various countries, on the understanding that the countries concerned request UNIDO's support.

- 40) Albania: UNIDO continued providing support to the NOU of Albania in implementing the plan of action as contained in MOP Decision XV/26. Albania is in compliance with its Agreement of the ExCom and the 4th and 5th tranches were approved at the 54th ExCom Mtg.
- 41) Bosnia and Herzegovina: achieved compliance with the Annex B group III (methyl chloroform) and Annex E (methyl bromide) control measures, however, the Party's consumption of CFCs was inconsistent with its commitment contained in decision XV/30. Despite UNIDO's continuous follow-up, no progress was made in the implementation of the institutional strengthening project. The NOU has advised UNIDO that from 1st January 2009 no more CFC import licenses would be issued.
- 42) Congo DR: UNIDO in cooperation with the Government of Italy prepared and presented to the 51st meeting of the Executive Committee, a terminal umbrella project on behalf of the Democratic Republic of Congo addressing the consumption of ODSs in the solvents sector. The project addresses the use of CTC, TCA as well as CFC-113 and contains a phase out schedule that is in line with the plan of action adopted by the meeting of the Parties to aid the Government of the Democratic Republic of Congo in fulfilling its obligations. The project is implemented smoothly, the country is in compliance and the 2nd tranche of the project was approved at the 56th ExCom Meeting.
- 43) Guatemala: The first phase of the national methyl bromide phase-out plan implemented by UNIDO was successfully completed and the second phase is under preparation. The country is in compliance with its agreement of the ExCom.
- 44) Honduras: The first phase of the national methyl bromide phase-out plan implemented by UNIDO was successfully completed and the second phase is under implementation. The country is in compliance with its agreement of the ExCom.
- 45) Iran: The 50th meeting of the Executive Committee approved a project for the Islamic Republic of Iran, which addresses the phase out of CTC and TCA consumption in the solvent sector. The implementation of the project activities enabled the Party to meet its obligations for the phase out of CTC.
- 46) Libyan Arab Jamahiriya: Already in 2007, the Libyan Arab Jamahiriya fulfilled its commitments pursuant to decision XV/36, in which it was expected to establish, by 2004, a system for licensing imports and exports of ODS, including quotas.
- 47) Mexico: The 52nd meeting of the Executive Committee approved an umbrella project for terminal phase-out of CTC for implementation by UNIDO in Mexico. The implementation of the project will allow the Government of Mexico to sustain its current compliance with its CTC phase out obligations. CTC use will stop from 1 January 2009.
- 48) Pakistan: Decision XVIII/31 adopted Pakistan's plan of action to ensure the Party's prompt return to compliance with the Protocol's CTC control measures. The plan of action required Pakistan to reduce the CTC from 148.500 ODP-tonnes in 2005 to 41.800 ODP-tonnes in 2006. Pakistan has

quickly returned to compliance and reported that from 28 May 2007, Pakistan banned the import of carbon tetrachloride. The CTC sector phase-out plan is under implementation by UNIDO and the 3rd funding tranche was approved at the 54th ExCom Meeting.

- 49) Uruguay: Uruguay continues to be in advance of both its commitments under decision XVII/39 and its methyl bromide phase-out obligations under the Montreal Protocol. UNIDO is implementing a methyl bromide project in Uruguay which is expected to enable Uruguay to continue to meet its obligations contained in decision XVII/39. Furthermore, a technical assistance project was approved for Spain, with UNIDO as implementing agency, to introduce chemical alternatives in countries which have rescheduled methyl bromide phase out plan (Argentina and Uruguay)
- 50) Under the institutional strengthening projects regulatory and policy assistance targets were achieved through the progress in the implementation of the projects. During 2008 4 extensions were approved (Egypt, Oman, Montenegro, Turkmenistan) and six projects were completed (Egypt, Macedonia, Mexico, Montenegro, Oman, Romania) with the assistance of UNIDO. Furthermore, UNIDO provided assistance in maintaining the staff continuity and NOU mandate during re-organization of NOU in Serbia and in Montenegro as part of the Government restructuring process. 5 new extensions are under preparatory stage (Libya, Mexico, Qatar, Syria and Serbia).

Cumulative completed investment projects

- 51) Since 1993, UNIDO's cumulative number of completed investment projects has grown to 502. Out of a total of US\$ 327,014,333 of approved MF financing for completed projects, 98 per cent of these funds were disbursed. The average number of months from approval to first disbursement was 9.1 months. The average number of months from approval to completion was 31.9 months. The cost effectiveness of completed projects is US\$ 6.44/kg. Table 5 "Cumulative completed investment projects by region, sector and implementation characteristics" illustrates more details, presenting information both on a regional and on a sectoral basis. The vast majority of completed investment projects have been implemented with disbursements of funds during implementation; only ten retroactively funded projects were implemented by UNIDO.

Cumulative completed non-investment projects

- 52) Since 1993, UNIDO's cumulative number of completed non-investment projects, including the preparation of RMPs, is 162. Out of a total of US\$ 23,057,106 of approved MF financing, 99 per cent of funds have been disbursed. Except for twenty-five institutional strengthening projects, all UNIDO completed non-investment projects were objective-sensitive. Disbursement took place during implementation for all completed projects. Table 6 "Cumulative completed non-investment projects by region, sector and implementation characteristics" provides details according to geographic region and sectors.

Cumulative ongoing investment projects

- 53) By the end of 2008, UNIDO's cumulative portfolio of ongoing investment, demonstration and recovery and recycling projects contained 86 projects. Of the US\$ 102,374,196 approved budget, 41 per cent has been disbursed. It took an average of 6.9 months from approval to first disbursement. The Africa region had 28 ongoing projects, Asia and the Pacific 25 ongoing projects, Europe 16 ongoing projects and Latin America and the Caribbean 17 ongoing projects. Table 7 "Cumulative ongoing investment projects by region, sector and implementation characteristics" illustrates the implementation characteristics among regions and sectors for UNIDO's ongoing investment projects.

The ongoing projects are objective sensitive and the disbursement of funds takes place during implementation. There are no retroactive projects.

Cumulative ongoing non-investment projects

- 54) At the end of 2008, UNIDO's cumulative portfolio of ongoing non-investment projects, including preparation of RMPs, consisted of 22 projects. Out of a total of US\$ 5,723,493 approved funding, 39 per cent has been disbursed. Table 8 "Cumulative ongoing non-investment projects by region, sector and implementation characteristics" illustrates details, presenting the projects according to regions, sectors and types.

V. Status of Agreements and Project Preparation by Country

Agreements to be signed/executed/finalized and ready for disbursing

- 55) As soon as a project is approved by the Executive Committee and after having notified the respective authorities, UNIDO secures officially from the recipient country's Ozone and project authorities, validity/confirmation of basic project data, such as actual ODS consumption; validity of counterpart commitment, etc., since by this time, a substantial period of time might have elapsed from the time of formulation of the project, and the projects, in most cases, are adjusted as a result of the negotiations during the approval process. After this, wherever it is required by the Country, UNIDO prepares and signs with the Ozone Authorities the agreement of cooperation. UNIDO prepares detailed Terms of Reference (TOR) for services to be rendered under the project. The TOR and the list of potential suppliers are approved by the counterpart. The bidding and subcontracting takes place based on the mutually agreed TOR. The first payment is due upon entry into force of the first contract. The above-illustrated preparatory work explains, for multi-year programmes, investment, demonstration and recovery and recycling projects, the time elapsing between project approval and first disbursement.

Project preparation by country, approved amount and amounts disbursed

- 56) As of the end of 2008, UNIDO had active project preparation funding amounting to US\$ 4,466,250 out of which US\$ 296,691 has been disbursed. The majority of these projects are the recently approved HPMP preparation activities amounting to US\$ 4,271,250, which explains the low level of disbursement. Of these, 14 preparatory assistance activities are under implementation in Africa, 17 in Asia and the Pacific, 10 in Europe and 5 Latin America & Caribbean.
- 57) The following table presents the list of 39 ongoing HCFC project preparation projects under UNIDO's implementation.
- 58) While maintaining an individual approach in the preparation of the relevant HPMPs in order to address the specific needs of the various countries, UNIDO is also implementing a common and coordinated overall approach in the preparation stage of the various HPMPs. In particular, UNIDO makes regular follow up meetings on the project implementation status in order to share the experiences and best approaches to implement and design the HPMPs.
- 59) Main purpose of this coordination activity is to verify the compliance with Decision ExCom 54/39 and to ensure that the implementation of an HCFC phase-out management plan (HPMP) include in a timely manner the stage one of the HPMPs, which would address the freeze in 2013 and the 10 per cent reduction in 2015. Stage one of the HPMP will be included within the framework of the over-

arching-strategy and will contain commitments to achieve the 2013 and 2015 HCFC control measures together with a performance-based system to enable the annual release of funding based on the completion of planned activities. Consideration will also be given to address properly the HCFC control measures in legislation, regulations and licensing systems. Furthermore, for countries that choose to implement investment projects in advance of completion of the HPMP, the approval of each project will result in a phase-out of HCFCs to count against the consumption identified in the HPMP.

- 60) Details of each individual HPMP under UNIDO's implementation are contained in Annex II of UNIDO's 2008 Progress and Financial Report, including also the most updated status of implementation of the various activities, including the selection of the strategy adopted in various countries with regard to the data collection and analysis as well as strategy planning.

Country	Project Title	Approved Funding (US\$)
Albania	Preparation of a HCFC phase-out management plan	30,000
Algeria	Preparation of a HCFC phase-out management plan	85,000
Argentina	Preparation of a HCFC phase-out management plan	78,000
Bahrain	Preparation of a HCFC phase-out management plan	45,000
Bosnia & Herzegovina	Preparation of a HCFC phase-out management plan	150,000
Cameroon	Preparation of a HCFC phase-out management plan	85,000
China	Preparation of a HCFC phase-out management plan (XPS foam sector)	84,000
China	Preparation of a HCFC phase-out management plan (Room air-conditioning sector)	500,000
Croatia	Preparation of a HCFC phase-out management plan	150,000
DPR Korea	Preparation of a HCFC phase-out management plan	50,000
Egypt	Preparation of a HCFC phase-out management plan	195,000
Honduras	Preparation of a HCFC phase-out management plan	115,000
India	Preparation of a HCFC phase-out management plan (transportation refrigeration and air-conditioning sectors)	70,000
Iraq	Preparation of a HCFC phase-out management plan	30,000
Jordan	Preparation of a HCFC phase-out management plan	150,000
Jordan	Preparation of a demonstration project for the conversion of HCFC to non-HCFC technology in the manufacturing of mini-split units at Petra Engineering	40,000
Kuwait	Preparation of a HCFC phase-out management plan	70,000
Libya	Preparation of a HCFC phase-out management plan	85,000
Macedonia, FYR	Preparation of a HCFC phase-out management plan	85,000

Administrative Issues (Operational, Policy, Financial and Other Issues)

Meetings attended

61) UNIDO attended/participated in the following meetings:

No.	Title of meeting	Place	Date
1.	Inter-Agency Coordination Meeting	Montreal, Canada	January 2008
2.	Regional Workshop on Phasing-out CFC in MDI	Langkawi, Malaysia	March 2008
3.	Joint Meeting of SEAP and South Asia Networks of ODS Officers, 'Roadmap to 2010'	Langkawi, Malaysia	March 2008
4.	Annual Meeting of the Regional Ozone Network for Europe & Central Asia	Tirana, Albania	March 2008
5.	HCFC Seminar organized by MLFS	Montreal, Canada	April 2008
6.	54th Meeting of the Executive Committee for the Implementation of the Montreal Protocol	Montreal, Canada	April 2008
7.	Inter-Agency Meeting for the finalization of the Annual Work Plan under the CTC Phase-out for 2008	New Delhi, India	April 2008
8.	2008 Joint Main Meeting for ODS Officers' Networks of African English-Speaking and West Asia Countries	Cairo, Egypt	May 2008
9.	Regional Workshop on Uses of Methyl Bromide Alternatives in the Date Sector	Cairo, Egypt	May 2008
10.	ECA contact group meeting on HCFC-related policies, guidelines and preparation of HCFC national phase-out plans	Ohrid, The Former Yugoslav Republic of Macedonia	May 2008
11.	HCFC Stakeholders Consultation Meeting	New Delhi	June 2008
12.	Open-ended Working Group Meeting of the Parties	Bangkok, Thailand	July 2008
13.	40th Meeting of the Implementation Committee under the Non-compliance Procedure of the Montreal Protocol	Bangkok, Thailand	July 2008
14.	Consultative Meeting on Essential Use Nominations (EUNs) for CFCs for MDI Manufacturing in Article 5 Countries beyond 2009	Bangkok, Thailand	July 2008
15.	55th Meeting of the Executive Committee for the Implementation of the Montreal Protocol	Bangkok, Thailand	July 2008
16.	2008 Compliance Assistance Programme (CAP) Advisory Group Meeting	Paris, France	September 2008
17.	2008 Meetings of South Asia Network of ODS Officers	Tokyo, Japan	September 2008
18.	II International Conference on Methyl Bromide Alternatives	Havana, Cuba	September 2008
19.	Inter-Agency Coordination Meeting	Montreal, Canada	October 2008
20.	Main Meeting of the Ozone Action Networks from Central America, South America, Mexico and the Caribbean	Santo Domingo, Dominican Republic	October 2008
21.	56th Meeting of the Executive Committee for the Implementation of the Montreal Protocol	Doha, Qatar	November 2008
22.	41 st Meeting of the Implementation Committee under the Non-compliance Procedure for the Montreal Protocol	Doha, Qatar	November 2008
23.	20 th Meeting of the Parties to the Montreal Protocol	Doha, Qatar	November 2008

No.	Title of meeting	Place	Date
24.	8 th Meeting of the Conference of the Parties to the Vienna Convention	Doha, Qatar	November 2008
25.	Inter-Agency Coordination Meeting on the preparation of HPMP	Buenos Aires, Argentina	December 2008
26.	Contact group meeting on TPMP implementation and assessment of awareness raising activities	Chisinau, Republic of Moldova	December 2008
27.	International Workshop on Promotion of Methyl Bromide Alternatives to Comply with its Phase-out	Tel Aviv, Israel	December 2008

Implementing agency and other cooperation

- 62) Cooperation with UNDP and the World Bank: Several ongoing performance-based, multi-year agreements are being co-implemented with UNDP and the World Bank, while a number of HPMP preparatory activities in different countries and regions are being implemented together with UNDP and/or the World Bank.
- 63) Cooperation with UNEP: In addition to the national phase out plans and TPMPs approved before 2008 and are co-implemented with UNEP, 9 new TPMPs and 1 new NPP was approved in 2008 for joint implementation with UNEP. Furthermore, several HPMP preparatory activities are being jointly implemented by UNEP. UNIDO is also regularly attending and contributing to regional workshops and other specialized meetings organized by UNEP.
- 64) Participation in inter-agency meetings: As in the past years, UNIDO participated in all major inter-agency coordination meetings organized by either the Multilateral Fund Secretariat or by any of the other implementing agencies.
- 65) Cooperation with Bilateral Agencies: During 2008, altogether 6 bilateral projects were approved for UNIDO's implementation, four by Italy and 2 by Spain.

In cooperation with France, Germany and Japan a strategic demonstration project for accelerated conversion of CFC chillers in 5 African Countries (Cameroon, Egypt, Namibia, Nigeria and Sudan) is ongoing. The French and Japanese components are implemented by UNIDO with close cooperation with all participating bilateral agencies.

All bilateral projects under UNIDO's implementation are listed in the below table.

Bilateral Agency	Country	Project Title	Impact	Approved Funding (US\$)	Status
France	Regional Africa	Strategic demonstration project for accelerated conversion of CFC chillers in 5 African Countries (Cameroon, Egypt, Namibia, Nigeria and Sudan)	0.0	184,000	ONG
France	Morocco	Elimination de l'usage de bromure de methyle dans la production de fleurs coupees et de bananes	61.0	673,973	ONG
Germany	Egypt	Training of refrigeration technicians in the framework of the Refrigerant Management Plan of Egypt	0.0	251,623	COM

Bilateral Agency	Country	Project Title	Impact	Approved Funding (US\$)	Status
Italy	Cameroon	Total phase-out of methyl bromide used in stored commodities fumigation.	14.5	259,713	ONG
Italy	China	Sector plan CFC final phase-out: domestic refrigeration and domestic refrigeration compressors	181.0	1,788,991	COM
Italy	China	National phase-out of methyl bromide (phase II)	534.0	4,000,000	ONG
Italy	DR Congp	Umbrella project for terminal phase-out of ODS in the solvent sector	20.7	432,660	ONG
Italy	Mexico	National methyl bromide phase-out plan (first tranche)	70.0	500,000	ONG
Italy	Morocco	Phase-out of methyl bromide used as a soil fumigant in the production of green beans and cucurbits (first tranche)	15.0	310,000	ONG
Italy	Romania	Phase out of methyl bromide in horticulture	93.9	630,517	COM
Italy	Senegal	Terminal phase-out management plan for CFCs (first tranche)	0.0	220,000	ONG
Italy	Serbia	Terminal CTC phase-out project	2.6	49,324	ONG
Italy	Serbia	Replacement of CFC-11 with cyclopentane foam blowing agent and CFC-12 with HFC-134a refrigerant in the manufacture of domestic refrigerators and freezers at Obod Elektroindustrija	94.9	1,683,135	COM
Japan	Regional Africa	Strategic demonstration project for accelerated conversion of CFC chillers in 5 African Countries (Cameroon, Egypt, Namibia, Nigeria and Sudan)	0.0	700,000	ONG
Japan	China	Phasing out ODS in the production of compressors at Changshu Refrigerating Equipment Works	75.0	2,250,000	FIN
Japan	China	Refrigeration servicing sector CFC phase-out plan (first tranche)	0.0	1,000,000	COM
Japan	China	Refrigeration servicing sector CFC phase-out plan: second tranche	511.0	3,000,000	ONG
Japan	Indonesia	Phase out of CFC-11 by conversion to HCFC-141b in the manufacture of rigid polyurethane foam for insulating purposes at Bina Teknik Co.	22.8	117,889	COM
Japan	Indonesia	Phase out of CFC-11 by conversion to HCFC-141b in the manufacture of rigid polyurethane foam for insulating purposes at Aneka Citra Refrigeratama Co.	18.2	142,506	COM
Spain	Brazil	Total phase-out of MB used in tobacco, flowers, ornamental plants, strawberries and other uses	65.4	580,390	COM
Spain	Regional LAC	Technical assistance to introduce chemical alternatives in countries which have rescheduled methyl bromide phase out plan (Argentina and Uruguay)	0.0	147,400	ONG
Spain	Mexico	Technical assistance to comply with 2005 phase-out of 20% of methyl bromide	107.2	707,965	COM
		TOTAL	1,887.2	19,826,724	

Other issues

- 66) In February 2008, UNIDO organized a seminar on alternative substances and technologies to phase out HCFCs in Article 5 countries and in Countries with Economies in Transition. Representatives from the MLF Secretariat, Donor countries, Ozone Units, TEAP, sister agencies, Greenpeace, refrigeration training centers, technology providers as well as chemical and equipment suppliers were participating in the workshop. As result of the seminar, UNIDO prepared an HCFC Guidebook which will be published during 2009.
- 67) The status of ongoing projects is described in Annex I of the Narrative. The success and timely implementation of these activities are crucial in the current compliance period. In order to ensure timely project completion of projects approved so far, and to facilitate compliance of the recipient countries with their MP obligations, in 2008, UNIDO has continued to practice the following initiatives, which supported successful project implementation:
- Regular missions to ozone offices and project sites are organized to monitor together with the ozone officers the implementation of national and/or sector phase-out plans and ongoing stand alone projects. UNIDO visits the respective ozone offices at least once a year. When required, UNIDO fields ad-hoc missions and requests support from the field representatives, who are in regular contact with the ozone office of the country to organize training, clear equipment from the customs, recruit national experts, undertake local procurement, process project travels, etc.
 - Good cooperation with the national ozone offices has continued and regular follow up of the implementation process is being done by the staff of the ozone office together with UNIDO's national and international consultants and project managers. This ensures that effective actions on critical issues such as resolving bottlenecks in site preparation, customs clearance, installation, commissioning and safety certification, monitoring of destruction of CFC-related equipment are taken in a timely manner.
 - UNIDO is regularly attending Regional Network Meetings and respective workshops providing additional support to our counterpart countries.
 - UNIDO's field representation is receiving regular training on Montreal Protocol issues.
 - One staff member is implementing Montreal Protocol projects directly from UNIDO's Regional China Bureau to provide on-site assistance in the Asia and Pacific Region enabling closer follow-up on project implementation. Based on the positive experience gained in China the practice will be introduced in other countries and regions.
 - Regular communication and interaction between regional and country offices about the implementation process has ensured the smooth flow of project activities. As in previous years, directors of UNIDO regional and country offices are regularly briefed at UNIDO HQs on ongoing and possible future activities. They are involved in the implementation process and are

following up the progress of the programmes. In turn, the representatives brief headquarter staff working in a specific country on the activities in the field and problems faced, if any.

- UNIDO also provides, when requested, support such as policy assistance, putting in place relevant legislation etc.

ANNEX I – Country Development Highlights

Status of the implementation of approved activities

Albania

Phase-out of ODS

The national ODS phase-out plan is implemented by UNIDO while UNEP is in charge of institutional strengthening. The delivered refrigeration demonstration unit for training of service technicians is operational. In order to ensure successful operation of the refrigerant recovery and recycling network component, it was agreed that first an enabling environment should be established by putting more emphasis on the reuse scheme, enforcement and code of practice before purchase and distribution of the equipment. Therefore, two national experts were recruited for preparing the code of practice as well as for updating the training manual and organizing training workshops. Purchase of equipment for vocational schools was initiated which was delivered in 2007 as requested by the Ozone Unit Manager. A joint mission with UNEP was fielded in 2007. Training workshops and training related to the equipment were planned, equipment for vocational schools were delivered, the training conducted and hence this component is completed. A national consultant was recruited and international experts provided advice on technical matter and legislation. Procurement of tools and equipment for service workshop was done in 2008 and under the third tranche R&R equipment was ordered and delivered. The fourth and fifth tranches were approved at 54th ExCom Meeting. Translation of manuals and training works are planned in 2009. Management and monitoring programme are ongoing.

Algeria

1. Phase-out of CFCs

The terminal umbrella project in the commercial refrigeration sector was approved by the Executive Committee at its 44th meeting. In 2007, the ownership of the foaming equipment, which was supplied to a company, which went bankrupt after the completion of an earlier individual investment project, was planned to be transferred to the eligible enterprises under the terminal umbrella project. Despite several attempts to transfer the equipment to the subject companies the legal process is still ongoing and with the agreement of the Executive Committee UNIDO proceeded with the purchase of the two foaming machines as originally planned in the project document. The delivery of the equipment is expected in April 2009. The request for proposal to supply services related for the training on the development of prototypes has to be re-announced, since none of the French institutes identified was interested in bidding for the project. The Ozone Office agreed to re-initiate the bid accepting that the training would be conducted in English with the assistance of a translator.

The first tranche of the National ODS Phase out Plan of Algeria was approved at the 53rd Executive Committee Meeting. Implementation of the project started beginning 2008. Survey of the refrigeration service sector as well as the foam sectors are being completed by the National Ozone Office (NOU). A national expert for the review and update of the ODS legislation was recruited. The bidding for the update of the refrigeration curricula and the preparation of the Code of Practice was completed. Award of contract is expected in February 2009. Investment activities in the refrigeration servicing and the foam sectors are planned in 2009. UNIDO is still waiting for the NOU's nomination for the PMU.

2. Phase-out of Methyl Bromide

A technical assistance project to phase out methyl bromide in pulses disinfestations was approved by the 50th Executive Committee. The project has an impact of 1.6 ODP tonnes. A Study Tour for some Algerian technicians was done. Training and the last set of equipment was procured and the project was successfully completed in December 2008.

Argentina

1. Phase-out of CFCs

The national CFC phase-out plan was approved at the 42nd ExCom Meeting and the first, second and third funding tranches were released. The fourth tranche will be submitted to be released at the 53rd ExCom Meeting for approval. The 2005 CFC consumption target was 2,047 ODP tonnes and 1,676 ODP tonnes were achieved. By end of 2006, about 5,000 technicians have already been trained. Servicing tools and R&R equipment were distributed among the eligible service shops. In 2007 training of technicians continued. Equipment for 2 refrigeration and 9 R&R centers were purchased. Technicians received tools and R&R equipment. End user sector survey continued. Detailed report was submitted to 53rd ExCom Meeting based on which the 4th tranche was released. The R&R and refrigeration centers started their operation in 2008. The end user sector activities were continued. Further training and equipment for technicians were provided. Training of customs officers was carried out. The before-mentioned activities will be continued in 2009 with an increased focus on the end-users sector and ODS destruction as well as monitoring of project performance.

2. Phase-out of Methyl Bromide

According to the revised agreement approved by the 45th Executive Committee, the project in strawberry, protected vegetables and cut flower production will be mainly implemented until 2010 leaving a small consumption till 2015. The project will continue with the training and secure the compliance with the phase out chronogram. The project is expected to be complete in January 2015. As per Decision 45/13, before the end of 2010, UNIDO and Argentina have to submit a full report on the implementation of the phase out plan together with the status report on the alternatives to methyl bromide in the strawberry sector available in Argentina. In addition, at that time, Argentine would consider the possibility of completing the phase out of methyl bromide earlier than 2015. The ban of import will be put in place once the total phase out is accomplished.

3. Phase-out of Solvents (CFC, CTC and TCA)

The plan for phase-out of ODS in the solvent sector was approved in December 2003 (41st ExCom). The approved date of completion is December 2009. UNIDO issued several contracts with local Argentinean companies, which provide for consultancy services on selection material of alternative solvents and conduction of compatibility tests. Two Solvent training workshops (i.e. for textile industry on the laboratory use) were conducted in December 2007. Identification of new or additional companies consuming ODS has been made in 2008 and activities for the phase out of TCA have been prepared. In 2009 laboratory uses were addressed. The project deals with TCA phase out in SSIs, therefore, one additional year for project implementation is needed.

Benin

Phase out of CFCs

The TPMP was approved at the 55th ExCom Meeting and the first tranche was released. UNEP is the leading implementing agency while UNIDO is cooperating. In October 2008 a joint UNEP UNIDO mission was organized to Benin where the implementation modalities have been agreed on. Bidding for the procurement of equipment is ongoing and is expected to be complete by 2nd Quarter 2009. The second tranche will be submitted in 2009.

Bosnia & Herzegovina

1. Phase-out of CFCs and TCA

The national ODS phase-out plan was approved at the 41st ExCom Meeting. The first funding tranche was completed in December 2006 and the project is progressing with the second tranche.

Equipment to phase out TCA at the only ODS consuming company was ordered, delivered, installed and commissioned, resulting in a total phase-out of 1.1 ODP tonnes of TCA in 2006. The request for release of the third tranche was submitted and approved at the 52nd ExCom Meeting, following the receipt of the 2005 verification report on the ODS consumption. The training of trainers programme for the refrigeration service technicians is in progress. The section of training centers has been completed and the section of training equipment is being coordinated with the NOU.

2. Phase-out of Halons

At the 42nd ExCom Meeting, a technical assistance project was approved to phase out the entire halon consumption in the country. Halon awareness and training workshop was carried out in February 2007. The annual activities for 2007 have been coordinated with the NOU, which is to confirm the selection of the beneficiary for halon R&R equipment. The scope of international and local equipment procurement was finalized. Bidding will start upon settlement of the issue with the customs clearance and VAT exemption.

Brazil

Phase-out of Methyl Bromide

The total phase-out of methyl bromide in tobacco, flowers, ornamentals, strawberries and other uses was approved at the 46th Meeting of the Executive Committee. Subcontract for training was awarded. The equipment (boilers and accessories) was delivered in 2006 and 2007. Training continued in 2007 and the remaining equipment was purchased and delivered in 2008. Additional 34 OPD tones have been phase out during 2008. The project was successfully completed in December 2008.

Burundi

Phase-out of CFCs

The TPMP was approved at the 55th ExCom Meeting and the first tranche was released. UNEP is the leading implementing agency while UNIDO is cooperating. During 2009 equipment will be purchased once UNIDO received guidance from the lead agency. Submission of the second tranche is expected in 2009.

Cameroon

Phase-out of CFCs and TCA

A terminal CFC/TCA phase-out management plan was approved at the 50th Executive Committee. The first and second funding tranches were released at the 50th and 54th ExCom Meeting respectively. In 2007 the PMU was established. The solvent component phasing out TCA has been successfully completed during 2008. In addition training of technicians and custom officers as well as a supplementary R&R programme was implemented. For 2009 additional training of technicians focusing on drop-in technologies and alternatives, extension of customs training, enforcement of legislation and public awareness activities.

China

1. Phase-out of CFCs

Under the domestic refrigeration sector plan, the conversion of all domestic refrigeration companies under this project was completed. Official commissioning also took place, which enables transfer of titles to the enterprises. Technical assistance to compressor manufacturing enterprises was undertaken in 2008. Ban of the use of CFCs in the sector was issued. A TÜV workshop based on plant inspections was performed in 2008. Technical assistance in safety and monitoring and verification of the project performance will continue until end 2010 to ensure sustainability of the project.

The refrigeration servicing sector plan was approved at the 44th ExCom. After completion of the first four tranches the fifth tranche was approved at the 56th ExCom Meeting. The verification of national consumption was submitted to and accepted by ExCom each year. The implementation plan is being completed without delay. During 2008 the training of technicians has continued and technicians were provided with recovery and service tools. Training centers for the domestic and industrial refrigeration were established and additional training of service technicians and purchase of equipment for the technicians as well as continued monitoring of activities is planned for 2009.

The sector plan for the entire phase out of CFCs in the MDI sector in China was approved at the 56th ExCom Meeting. Implementation modalities have been agreed upon in December 2008. Terms of Reference are under preparation and it is expected that a subcontract will be signed with the Chinese counterpart in 2nd Quarter 2009.

2. Phase-out of Methyl Bromide Consumption Sector

The second phase of the national methyl bromide consumption phase out plan was approved at the 52nd ExCom Meeting, the second tranche of which was released at the 55th ExCom Meeting. Equipment procurement for the tobacco seedling sector was undertaken, in time for the crop season 2008. Subcontract for the ongoing tranche was issued in November 2008 and the final report is expected in July 2009.

3. Phase-out of Methyl Bromide Production Sector

The sector plan for the methyl bromide production sector was approved at the 47th ExCom Meeting. A subcontract was issued to SEPA in March 2006. The training plan was implemented and a working

arrangement contract was signed with the counterpart companies. The following activities have been implemented in 2008: a) Monitor the methyl bromide production, b) inspect the manufacturers and perform technical verification, c) management of production quota and d) signed agreement with producers for compensation against production reduction quota achieved and verified. The 2006 and 2007 production quotas were verified during 2008 and compensated accordingly. The total production target agreed with the MLF had been achieved. The second tranche was approved at the 56th ExCom Meeting. Methyl bromide production audit and supplementary verification of the methyl bromide feedstock use for the period 2005-2007 have been completed. Production data are in line with the agreement.

Colombia

Phase-out of Methyl Bromide

A technical assistance project for the phase out of the remaining methyl bromide consumption in Colombia was approved at the 55th ExCom Meeting. In December 2008 an international consultant was recruited to work on the alternatives in cooperation with a national agro institute. After completion of the national survey awareness raising activities will be organized.

Congo, Rep. of

Phase-out of CFC

The TPMP was approved at the 54th ExCom with UNEP as lead implementing agency. Implementation modalities have been agreed upon. Technical specification for equipment purchase was prepared and upon clearance of the NOU procurement process will start.

Cote d'Ivoire

1. Phase-out of Methyl Bromide

The phase-out of methyl bromide in the commodities and storage fumigation sectors was approved at the 42nd ExCom Meeting. Procurement and delivery of the last set of equipment was done in 2008. The project was successfully completed in December 2008 phasing out the remaining consumption of 3.8 ODP tonnes.

2. Phase-out of CFCs

At the 46th Executive Committee Meeting, a terminal aerosol sector project was approved for UNIDO with a total phase-out of 43.4 ODP tonnes of CFCs. Despite UNIDO's efforts to redeploy the equipment from Alkaloid, Macedonia (cancelled aerosol project) to COPACI, the redeployment was not successful. In addition, all attempts to restart implementation of the project have failed. The government requested cancellation of the project.

A TPMP was approved at the 45th ExCom Meeting with UNEP as lead implementing agency. Project implementation activities have been coordinated with the NOU and UNEP. Equipment will be purchased during 2009.

Croatia

Phase-out of CFCs

The complete phase out of CFCs as a result of the implementation of the terminal CFC phase-out management plan was achieved. Upon the request of the ExCom a verification audit was undertaken in 2008, which confirmed the successful implementation of the project. Monitoring activities are still ongoing to ensure the sustainability of the phase out.

Cuba

Phase-out of Methyl Bromide

At the 44th ExCom Meeting, a total phase-out project in soil, substrate, storage and structure fumigation was approved. Equipment including soil fumigation equipment was purchased and delivered in 2008. Training programme is ongoing and the project is planned to be complete in June 2009.

Democratic People's Republic of Korea

1. Phase-out of CFCs

The refrigeration sector phase-out plan for Korea was approved in 2003. The project is progressing with the second tranche. Remaining equipment for the conversion of the compressor factory is being ordered. Procurement of additional safety equipment is planned. The project is expected to be complete in June 2009.

UNIDO is in charge of the recovery and recycling component of the national CFC phase-out plan which was approved by the 47th Executive Committee and which is being implemented together with UNEP. Recovery and recycling equipment was purchased and additional tools and equipment are under procurement. The project is expected to be complete in December 2009.

2. Phase-out of CTC

The CTC terminal phase-out plan was approved at the 41st ExCom Meeting. All projects in the Cleaning Solvent sub-sector and the four projects in the Process Agent sub-sector have been completed. Equipment was installed for the three pilot pesticide production plants. With respect to the glass-lined reactors the export of these goods to DPR Korea was not permitted. UNIDO reported to the 55th ExCom of this fact. The ExCom requested UNIDO to sell the equipment as specified in Decision 55/12 and report back to the 57th ExCom.

The supplementary plan for terminal phase out of CTC was successfully completed in December 2008.

Dominican Republic

Phase-out of Methyl Bromide

Under the phase-out project in melon, flowers and tobacco, agreements with methyl bromide consumer farmers have already been made. Most of the supplies (chemicals, substrates, small equipment) agreed upon with the farmers, were purchased. In the flowers sector, methyl bromide has already been phased out. During 2008 technical support was provided to the flower sector on the use of steaming and in horticulture in general. In 2009 additional training will be provided and the project is expected to be complete in June 2009.

Egypt

1. Phase-out of CFCs

The national CFC phase-out plan was approved at the 46th Executive Committee and the first three tranches were released. The first part of the refrigeration service equipment was purchased and delivered. The training programme of 1,200 technicians was accomplished. The industrial refrigeration and chillers as well as the remaining commercial refrigeration manufacturers were addressed providing a package of technical assistance, equipment, training services and eligible incentives aimed to achieve the phase out target. For 2009 an expedited plan of action for the implementation of the third tranche was agreed upon between the Egyptian authorities and UNIDO.

The phase-out of CFC consumption in the manufacture of aerosol metered dose inhalers was approved at the 50th ExCom Meeting. The project has an impact of 159.5 ODP tonnes and is expected to be complete by December 2010. UNIDO contract for equipment procurement and technology transfer in the value of USD 5.1 million was awarded. After the completion of the int. bidding the selected Contractor, i.e. Impopharma, Canada suddenly withdraw from the contractual commitments. Two new bidding have been started (one for equipment, another for technology transfer). In 2008 UNIDO procured filling equipment for the two Egyptian companies (ADCO and EIPICO). The selection of the technology provided was completed in November 2008. The pilot batches of the first MDI are being planned to achieve by December 2009.

2. Phase-out of Methyl Bromide

The 20% methyl bromide reduction target was achieved in 2005 as a result of the implementation of the national phase-out plan for methyl bromide in horticulture and commodities fumigation. Completion of Phase 1 of this Project was completed in 2008 while the second phase was approved of the 56th ExCom Meeting. In 2009 additional equipment is going to be purchased for three horticulture companies and training will be provided in grafting.

Eritrea

Phase-out of CFCs

The TPMP was approved at the 54th ExCom Meeting with UNEP as the lead implementing agency. As per the ExCom's decision, no funding can be released until the confirmation of the report of the licensing system to the Ozone Secretariat had been received by the Fund Secretariat. Despite several follow-ups by UNEP and UNIDO the above confirmation has not yet been received. Thus, no activities could be implemented.

Georgia

Phase-out of Methyl Bromide

At the 47th ExCom Meeting, technical assistance for the elimination of methyl bromide in grain and storage facilities was approved for UNIDO. Equipment has been delivered and first training session was successfully undertaken in 2007. A second training session was organized and equipment installation was completed in 2008. Training activities are ongoing and the project is expected to be complete in December 2009.

Guatemala

Phase-out of Methyl Bromide

In 2008 the project continued supporting the melon growers in the elimination of the methyl bromide and the first phase was successfully completed in December 2008. The second phase will be submitted during 2009.

Guinea-Conakry

Phase-out of CFCs

The TPMP was approved at the 55th ExCom Meeting with UNEP as lead implementing agency. Technical specification for equipment purchase has been prepared and once UNIDO received the confirmation of NOU the bidding will start. The second tranche is expected to be submitted in 2009.

Honduras

1. Phase-out of Methyl Bromide

A new phase-out schedule was approved by the 47th Executive Committee for the methyl bromide sector plan in order to reach the 20 per cent reduction target by 2008 giving time to further develop and softly apply the new technology. Phase I of the programme was completed in December 2006. Phase II was approved by the 50th ExCom and the first, second and third funding tranches were released. Equipment for grafting and for laboratory was purchased. All equipment have been installed and commissioned and are fully operational. Training components will continue in 2009.

2. Phase-out of CFCs

The TPMP was approved at the 55th ExCom Meeting with UNEP as the lead implementing agency. An experienced national consultant is working on a national survey on the remaining CFC consumption. Furthermore, a technical institution is being trained in drop-in technologies with hydrocarbon refrigerant.

India

Phase-out of CTC Consumption and Production Sectors

The majority of the enterprises have been converted. However, the installation of equipment in a few companies is still to be undertaken in 2009. We expect project completion in 2009.

Indonesia

The methyl bromide and the terminal solvent project were successfully completed in 2008.

Iran

1. Phase-out of CFCs

Under the activity on phasing out ODS in manufacturing of flexible PU slabstock foam through the use of liquid CO₂ blowing technology at Bahman Plastic Co, the installation did not take place because the enterprise did not provide the supplier with information required prior to the installation despite numerous follow ups. The project is expected to be automatically cancelled at the 57th ExCom meeting since no progress has been made in two consecutive ExCom Meetings. The activity on phasing out of ODS in the manufacture of flexible slabstock foam through the use of LCD blowing technology at Esfanj Shirvan Co. The project was successfully completed in December 2008.

The national CFC phase-out plan was approved at the 41st Meeting of the ExCom in December 2003. During 2008 monitoring activities have been continued. One monitoring cell was established in each of the provinces. The project was successfully completed in April 2008.

The CFC phase out project in the MDI sector was approved at the 52nd ExCom Meeting. The TOR for technology transfer has been prepared and an international bidding started. In 2008 UNIDO procured filling equipment for the Iranian company Sina Darou. The technology provided was selected in November 2008. The pilot batches of the first MDIs are planned to be achieved in December 2009.

2. Phase-out of Methyl Bromide

The 47th Executive Committee Meeting approved a total phase-out project in soil fumigation for UNIDO. The impact of the project is 14.4 ODP tonnes. Boilers were purchased in 2006. The project was completed in December 2008.

3. Phase-out of Solvents (CTC and TCA)

A terminal solvent sector umbrella project was approved by the 50th Executive Committee Meeting. The project deals with the phase out of 52.7 ODP tones of CTC and TCA. It covers 6 small-scale industries. The CTC/TCA phase out in the companies has been achieved in 2008. All equipment have been procured and installed. Technical monitoring activities and two solvent training workshops as well as the preparation of solvent leaflets are planned to be conducted in 2009.

Kenya

Phase-out of Methyl Bromide

At its 53rd Meeting, the ExCom approved the request by the Government of Kenya to transfer responsibility for implementation of all remaining activities associated with the completion of the phase-out of methyl bromide in the cut-flower sector from UNDP to UNIDO.

The project will phase-out all soil uses of MB in Kenya and commits to permanently sustaining the consumption levels through the use of import restrictions and other policies it may deem necessary. During 2008 a UNIDO mission was undertaken to transfer the project team from UNDP to UNIDO and to discuss the plan of action. Most items were purchased and the training programme is underway. Progress report was submitted to the Executive Committee.

Kuwait

Phase-out of CFCs

The TPMP was approved at the 52nd meeting of the Executive Committee and approved in July 2007. The first tranche for a TPMP for Annex A group I substances was released in July 2007. The Annual Implementation Programme for 2007/2008 was prepared and agreed upon with the NOU and UNEP. Recovery and recycling equipment were procured. Training material for MAC retrofits was developed. The scheme for the implementation of a MAC retrofit incentive programme was agreed upon. The project is expected to be complete by June 2009.

Lebanon

Phase-out of Methyl Bromide

The methyl bromide phase-out project follows the ratification of the Montreal Protocol by the Government of Lebanon, which had planned a schedule for phasing out Ozone Depleting Substances (ODS). The Ministry of Environment in collaboration with UNIDO implements the project funded by the Multilateral Fund.

At its 52nd meeting, the Executive Committee approved the extension of project activities until the end of 2008 given the difficulties encountered by the project as a result of July 2006 war. The 2006 MeBr phase out target has been rescheduled over 2007 (5 ODP tons) and 2008 (4 ODP tons). Equipment and chemicals were delivered in 2008. Contracts with a national consultant as well as site engineers have been extended to ensure full implementation of the alternative technologies. A few public awareness publications are being prepared and monitoring activities are ongoing in 2009.

Libya

1. Phase-out of CFCs

The third tranche of the national CFC phase-out plan was released at the 54th ExCom Meeting. Technical specification on service equipment for 50 service shops was prepared and agreed upon with the NOU. Procurement is underway and offers are being evaluated. Delivery of equipment is expected in 2nd Quarter 2009. Training of service technicians will be organized after delivery of the respective equipment.

2. Phase-out of Methyl Bromide

At the 47th Executive Committee Meeting, a phase-out project in horticulture was approved for UNIDO. The second tranche under Spanish contribution has also been released at the 56th ExCom Meeting and is under implementation by UNIDO. The Greenhouse is under installation. The report on the 2007/2008 activities was received and the 2009 plan is under finalization.

3. Phase-out of Halons

The plan to phase out the import and net consumption of halons in the fire-fighting sector was approved by the 47th Executive Committee. The project has a total impact of 653.9 ODP tonnes. The initially identified entity to host halon banking equipment failed to obtain approval by the Ministry of Industry. A new entity (iron and steel company) has been suggested and the suitability is verified by the Government. Without the appointment of such entity no project activity can start.

Macedonia, FYR

Phase-out of CFCs

The terminal phase-out management plan was approved at the 45th Executive Committee. The fourth tranche was released at the 56th ExCom Meeting. Monitoring and reporting activities on the import control and utilization of R&R equipment as well as operation of R&R and training centers are progressing according to the original schedule.

Madagascar

Phase-out of CFCs

The TPMP was approved at the 52nd ExCom Meeting with UNEP as lead implementing agency. The second tranche was released at the 56th ExCom Meeting. The plan of action for the implementation of the second tranche was reviewed and agreed upon with the government. The Terms of Reference for the supply of equipment were prepared and are under review of the government. The project is expected to be complete in November 2009 as originally planned.

Mexico

1. Phase-out of Methyl Bromide

The technical assistance project was completed in June 2008 helping Mexico to achieve the 20% reduction target. Subsequently at the 54th ExCom Meeting the national methyl bromide phase out plan was approved. The project started its implementation. Agreements with the farmers have been drafted and are expected to be signed in due course. The Terms of Reference for the equipment purchase are under preparation according to the agreement.

2. Phase-out of CFC Consumption Sector

The national CFC phase-out plan was approved in 2004. Large-scale training continued, the technicians received recovery and service tools after successful completion of training. Equipment for 14 R&R centers was purchased. These centers were put into operation in 2008. In 2009 additional training of technicians and phase out in the end-user sector is planned. Monitoring of implementation and verification of performance is continuing until end 2010 to ensure sustainability.

The CFC phase out project in the manufacture of metered dose inhalers was approved at the 53rd ExCom Meeting. Two biddings for the equipment procurement and for technology transfer started in 2008. In 2008 UNIDO procured filling equipment for the Mexican company Salus. The selection of technology provider was completed in November 2008. The pilot batches of the first MDIs are planned by December 2009.

3. Phase-out of CFC Production Sector

The CFC production was closed on 25 August 2005. Full phase-out took place. The CFC consumption monitoring system is ready and operational. Annual verification audits have taken place confirming the complete phase out of CFC production. At the 56th ExCom it was decided that no further external audit is required. Further monitoring, policy and awareness measures will be implemented in 2009.

4. Phase-out of Solvents (CTC)

The umbrella project for terminal phase-out of CTC was approved at the 52nd ExCom Meeting. Bidding for equipment procurement was completed in October 2008. Equipment is being manufactured and installation is planned for 2009. The company Mexichem will stop the use of CTC from 1 January 2009 to prepare premises for new equipment.

Montenegro

Phase-out of CFCs

The TPMP was approved at the 53rd ExCom Meeting. The implementation of the project started. The implementation modalities have been agreed upon. Equipment for training purposes was purchased. Project Management Unit was established and trained.

Morocco

Phase-out of Methyl Bromide

The sixth tranche of the phase-out project for soil fumigation in the tomato sector was released in 2008. In 2008 the project was implemented according to the work plan. Expected reduction of methyl bromide consumption was 68.4 ODP tones.

The methyl bromide phase-out project in the production of green beans and cucurbits was approved at the 56th ExCom Meeting as the final funding of the methyl bromide phase out in Morocco. In February 2009 a UNIDO mission is planned to Morocco to agree on the implementation modalities and to set up an action plan. In 2009 the recruitment of national consultant is planned to undertake training activities. Furthermore, equipment and chemicals will be provided.

Niger

Phase-out of CFCs

The TPMP was approved at the 54th ExCom Meeting with UNEP as lead implementing agency. Implementation modalities have been agreed upon. Technical specifications for equipment purchase were prepared and agreed upon with UNEP and NOU. The procurement process was initiated and the delivery of equipment is expected in 2nd/3rd Quarter 2009.

Nigeria

Phase-out of Solvents

The terminal ODS phase-out umbrella project was approved at the 43rd ExCom Meeting to phase out 166.7 ODP tonnes of CTC and 31.3 ODP tonnes of TCA. The fourth and last tranche was released at the 52nd ExCom Meeting. In 2008 solvents were purchased, equipment was distributed and training of the

national staff was conducted. In 2009 workshop for small-scale solvent users is under preparation. A team of national experts will be recruited to provide technical assistance to solvent users. Public awareness activities are continued. Enforcement of the legislation is planned.

Oman

1. Phase-out of CFCs

The TPMP project was approved at the 52nd ExCom. During 2008 equipment was delivered, training on good practices was completed. Training material for chiller retrofits was developed. The training is expected to take place in 1st Quarter 2009. The tranche is expected to be complete in April 2009 and the second tranche will be submitted.

2. Phase-out of Halons

The halon consumption phase-out project was transferred from the World Bank to UNIDO at the 46th ExCom Meeting. The halon awareness and training workshop has been carried out. Selection of halon R&R equipment has been completed. International bidding for R&R equipment was completed and purchase order was issued. Equipment for local procurement is being coordinated with the NOU. Expected completion is 2009.

Pakistan

1. Phase-out of CFCs

The implementation of the RMP was successfully completed in September 2008.

2. Phase-out of Solvents and Process Agents (CFC and CTC)

The process agent project at Himont Chemicals Ltd., was successfully completed in October 2008.

The national CTC phase-out plan was approved at the 41st Meeting of the ExCom. The third tranche was released at the 54th ExCom Meeting. In 2008 public awareness activities continued and purchase of equipment for three metal cleaning companies was finalized. Commissioning is being organized. Institutions for training and technology demonstration have been identified and purchase of equipment for these institutions is underway. Import control, monitoring and reporting is progressing.

Qatar

Phase-out of CFCs

A TPMP was approved at the 53rd meeting of the ExCom. The first tranche for the TPMP was approved in November 2007 and the project is planned to phase out of 3 ODP tonnes. The Annual Implementation Programme for 2008 was prepared and agreed upon with UNEP and NOU. Equipment for investment and non-investment activities were purchased by UNIDO. Training material on retrofitting of MACs and domestic refrigeration was prepared. Training will take place in 1st Quarter 2009 and second tranche will be requested.

Regional Africa

1. Phase-out of CFCs

The strategic demonstration project for accelerated conversion of CFC chillers was approved at the 48th ExCom for five African countries, i.e. Cameroon, Egypt, Namibia, Nigeria and Sudan. In order to secure the associated external resources, UNIDO drafted a project concept, which was submitted to the Steering Committee of the FGEF in December 2006. The project concept was endorsed and the chiller project was included in the FGEF pipeline for 2007. To date, the external resources were mobilized since the project was approved by the FGEF Steering Committee. UNIDO and the cooperating partner agencies received the clearance from the Secretariat for disbursement of the funds under the project. A Steering Committee at country level was established in Egypt, while the other countries are working on the establishment of their respective steering committees. Each country prepared a strategy for dealing with the chiller sector. Activities for chiller replacement will start in March 2009.

2. Phase out of methyl bromide

The regional demonstration project on alternatives to the use of methyl bromide for treatment of high moisture dates for Algeria and Tunisia was approved at the 54th ExCom Meeting. During 2008 subcontract was made with the local dates producer and laboratory in Algeria to undertake treatment and tests of dates. Due to difficulties in supplying the chemicals to the country the first laboratory tests were undertaken in France. The tests showed positive results. The detailed analysis is under preparation. During 2009 large-scale test are planned for both countries.

Regional Europe

Phase-out of CFCs

The demonstration project on the replacement of CFC centrifugal chillers was approved at the 47th ExCom for Croatia, Macedonia, Romania, Serbia and Montenegro. All eight chillers in Romania, Macedonia, Croatia and Montenegro and well as two other chillers in Serbia have been delivered and installed. UNIDO is waiting for the Secretariat's approval to disburse funding for the remaining two chillers in Serbia. UNIDO submitted a detailed report on the implementation of the chiller project to the 56th ExCom Meeting.

Romania

1. Phase-out of CFCs

At the 45th Executive Committee, a national CFC phase-out plan was approved for UNIDO. The third tranche was released at the 51st ExCom Meeting. In June 2008 a joint mission with Sweden was undertaken. Update of the vocational schools was initiated, while in July and August 2008 the PMU carried out a survey of schools educating students in refrigeration and air-conditions. The training of teachers took place in September 2008 and two teachers from each of the seven schools identified in the survey participated in the training.

2. Sector plan for production sector (fourth tranche)

The fourth tranche of the sector plan for production sector was approved in view of the progress already achieved in establishing the CTC incinerator in Chimcomplex and the completion of the removal of the capability to produce CTC at Oltchim. Since the CTC production has already been closed, UNIDO is continuing with the monitoring activities and annual verification audits.

3. Phase-out of CTC in the Consumption and Production of Process Agent Uses

A terminal phase-out management plan for phase out of process agent uses was approved at the 50th ExCom Meeting. The process design was made by UNIDO and project equipment was procured. Three biddings have been conducted to identify a local consultancy company to make a plant design documentation, which is needed for plant registration by Romanian authorities. However, UNIDO could not identify such a company. It was agreed with the Romanian authorities to change the Terms of Reference to include all remaining activities including plant design, equipment installation, piping, etc., and carry out a new bidding. There is no use of CTC by Oltchim, DEHPC is being purchased.

4. Phase-out of Halons

The halon management programme was successfully completed in June 2008.

Sao Tome and Principe

Phase out of CFCs

TPMP was approved at the 54th ExCom with UNEP as lead implementation agency. The implementation modalities have been agreed upon. The project activities started with the training of technicians in the use of hydrocarbon as drop-in. Equipment required for the drop-in was purchased for the technical institution. National consultant was recruited for the coordination of project activities. Three technicians were trained on the recovery and recycling issues. The second tranche is expected to be submitted in 2009.

Saudi Arabia

Phase-out of CFCs

The national phase out plan was approved at the 53rd ExCom Meeting with UNIDO as lead implementing agency and UNEP as cooperating agency. The Annual Implementation Programme for 2008 was prepared and agreed upon with UNEP and the Government. All equipment was procured in 2008 and delivery is expected in 1st Quarter 2009. Two technical assistance workshops were organized for the manufacturing sectors. In addition UNIDO contracted a company for the establishment of a data base for reporting and monitoring of the NPP implementation.

Serbia

Phase-out of CFCs

The national CFC phase-out plan was approved for Serbia and Montenegro at the 43rd ExCom Meeting. Since Serbia and Montenegro have separated in 2006, a revised agreement for Serbia was approved at the 50th ExCom Meeting. There is a delay in the completion of the aerosol project, which was caused by the change of the country's management. In November 2008 nomination of the Ozone Officers has been officially received by UNIDO. UNIDO mission was undertaken in December 2008 to speed up the implementation and to agree on an accelerated work plan. New training institutions will be selected and the Terms of Reference to carry out conversion at foam companies have been prepared and contractor was selected after bidding. New equipment is expected in 1st half of 2009. Local contract for pre-installation works and local purchase of instruments and services is under preparation.

Sudan

Phase-out of CFC and CTC

The national CFC and CTC phase-out plan was approved at the 44th ExCom Meeting. The third tranche was approved 53rd ExCom Meeting. Training of technicians has continued with two training courses for 16 trainers operating the R&R centers. Upgrade of national R&R scheme was performed. Technical specification to purchase service equipment for newly identified/certified training centers will be prepared in 2009. National consultant was recruited to support the NOU and coordinate implementation activities.

Syria

1. Phase-out of CFCs

The national CFC phase-out plan was approved at the 49th Executive Committee meeting. The second tranche was released at the 56th ExCom Meeting. The first bidding for the equipment purchase was unsuccessful and is now being repeated. The receipt of the offers is expected for end of February 2009. The country's monitoring system is under establishment. The component update of the vocational schools is ongoing.

The demonstration project on the replacement of CFC centrifugal chillers was approved at the 47th Executive Committee. External resources were secured and disbursement of funds was confirmed by the Secretariat. Three chillers for the Le Meridien Hotel were delivered and installed in 2008. The retrofitting of the four chillers at the El-Basel hospital is in process. The project is expected to be complete in 2nd Quarter 2009. .

2. Phase-out of Methyl Bromide

The phase-out of methyl bromide in grain storage is progressing with the third tranche. Phosphine generators and additional equipment for phosphine application have been delivered and necessary training was provided. Purchase of additional equipment and contract with national expert will be extended.

The national phase-out plan in soil fumigation was approved at the 49th Executive Committee. National institution was selected and contracted. Grafted plants were distributed to farmers. Additional equipment will be purchased, contracts for national experts will be extended and additional training will be provided to farmers in 2009.

Turkey

Phase-out of Methyl Bromide

Phase-out of Methyl Bromide for Soil Fumigation in Protected Horticulture and Cut-flower Production in Turkey was approved in 2001, but was started only from the beginning of 2003 and finally received considerable impetus at the end 2004-2005 and also in 2006.

The aim of this project was to phase out 293,4 ODP tons of methyl bromide used in protected horticulture and cut-flower production, introducing suitable alternative methods and minimizing economic losses due to the ban on methyl bromide. Three steam machines and one soil-less culture system were provided to end users who were also trained by suppliers.

Training activities included, nine training programs (3-5 days) given by international experts on soil-less culture, IPM for cut-flower growers, and trust tomato and pepper crop management for the horticulture sector, distributing leaflets, on farm trainings, extension personnel trainings, radio and TV programs. In total, 700 vegetable and cut flower growers attended the training programs. Grafting trials for the second year were finished and will be followed with additional trials for further confirmation of the results. Some awareness raising activities and finalization of publications are still outstanding.

Uruguay

Phase-out of Methyl Bromide

An extension of the phase-out agreement was approved at the 46th Executive Committee in July 2005. According to this agreement, total phase-out of methyl bromide will be achieved by January 2013. Subcontractor (INIA) continued training and assistance to farmers. In one region, methyl bromide has already been phased out. In 2007, awareness activities to convince farmers to eliminate methyl bromide in one of the remaining regions were conducted. Some test on Iodure methane, which could be a convincing alternative were finalized. The test with Iodure methane gave very good results. Monitoring of the phase out will be continued until the complete phase out is achieved.

Venezuela

Phase-out of CFCs

The national CFC phase out plan was approved at the 42nd ExCom Meeting. Three tranches were successfully completed and the fourth tranche was submitted to the 56th ExCom consideration. Since additional verification was requested by the ExCom, the tranche is being submitted to the 57th ExCom. The recovery and recycling scheme is fully operational. Reclaiming equipment was installed in the premises of PRODUVEN and is operating as part of the R&R system. At present, 4,400 technicians have been trained and 3,890 technicians were trained and certified. A chiller programme will be implemented based on an incentive programme and revolving fund. The data monitoring and reporting system and the training and certification of technicians will continue in 2009.

Yemen

Phase out of CFCs

The national ODS phase out plan for Yemen was approved at the 55th ExCom Meeting with UNEP as lead implementing agency. The Executive Committee decided to convert the foam companies to HCFC-141b technology due to the fact that there was an urgent need to phase out CFCs by 2010. Yemen will be eligible for funding for second stage conversion for the companies covered by the NPP. The equipment for the refrigeration manufacturing and servicing components of the project was purchased at the end of December 2008. A specialized foam expert was recruited and visited Yemen in early December 2008 to assess the situation of the 10 commercial refrigeration companies and study the feasibility of implementing hydrocarbon technology. The Government is considering merging 5 companies and providing them with Hydrocarbon machinery, while the rest will be supplied with HCFC machinery.

Zambia

Phase out of methyl bromide

A technical assistance project for the complete phase out of methyl bromide in the tobacco, cut-flowers, horticulture and post harvest uses was approved at the 56th ExCom Meeting. Working arrangement on implementation modalities is under finalization between UNIDO and the government. In 2009 activities will be focused on training in the tobacco and horticulture sectors. Training will be organized and relevant equipment will be distributed to the farmers.

Zimbabwe

Phase-out of Methyl Bromide

Two methyl bromide phase-out projects in grain fumigation and tobacco seedlings were successfully completed in 2008.

UNIDO Progress and Financial Report 2008
Table 1: Annual Summary

Year Approved/ Implementation Characteristic	Number of Approvals*	Number Completed	Per Cent Completed	Consumption ODP to be Phased Out*	Consumption ODP Phased Out	Per Cent of Consumption ODP Phased Out	Production ODP to be Phased Out*	Production ODP Phased Out	Per Cent of Production ODP Phased Out	Approved Funding (US \$)	Adjustment (US \$)	Funds Disbursed (US \$)	Per Cent of Funds Disbursed	Balance (US \$)	Estimated Disbursement in Current Year (US \$)	Administrative Support (US\$)	Administrative Support Adjustment (US\$)	Interest earned and reported (US\$)
